Loyal user segments for fondi

English learners aged 15 ~ 30
from Southeast Asia, Central Asia, and North Africa

From Japan to a **Global** Language Learning Platform with Over **100 Million** Users

What goals are we aiming for, and at what scale?

	Users	Sales	Market cap
	All over the globe 90M MAU	ARR 600M USD	Growing after IPO 9B USD

What did
Duolingo do :

Transformed language learning into a 'game-like'
experience, and made it as addictive as 'social media'

What we
will change :

Enjoy language learning '**inside a gaming world**',
and turning it into '**social community**'.

Product Details & Traction

User's burning needs

In high economic growth countries,

Mastering English communication can change their lives.

The root of their needs

Enhancing job prospects through English skills.

- As numerous foreign companies are entering the market, being proficient in English communication can lead to a substantial increase in salary.
- Even with identical skill sets, salaries may easily double.

High needs,
but
low opportunities.

Practical opportunities

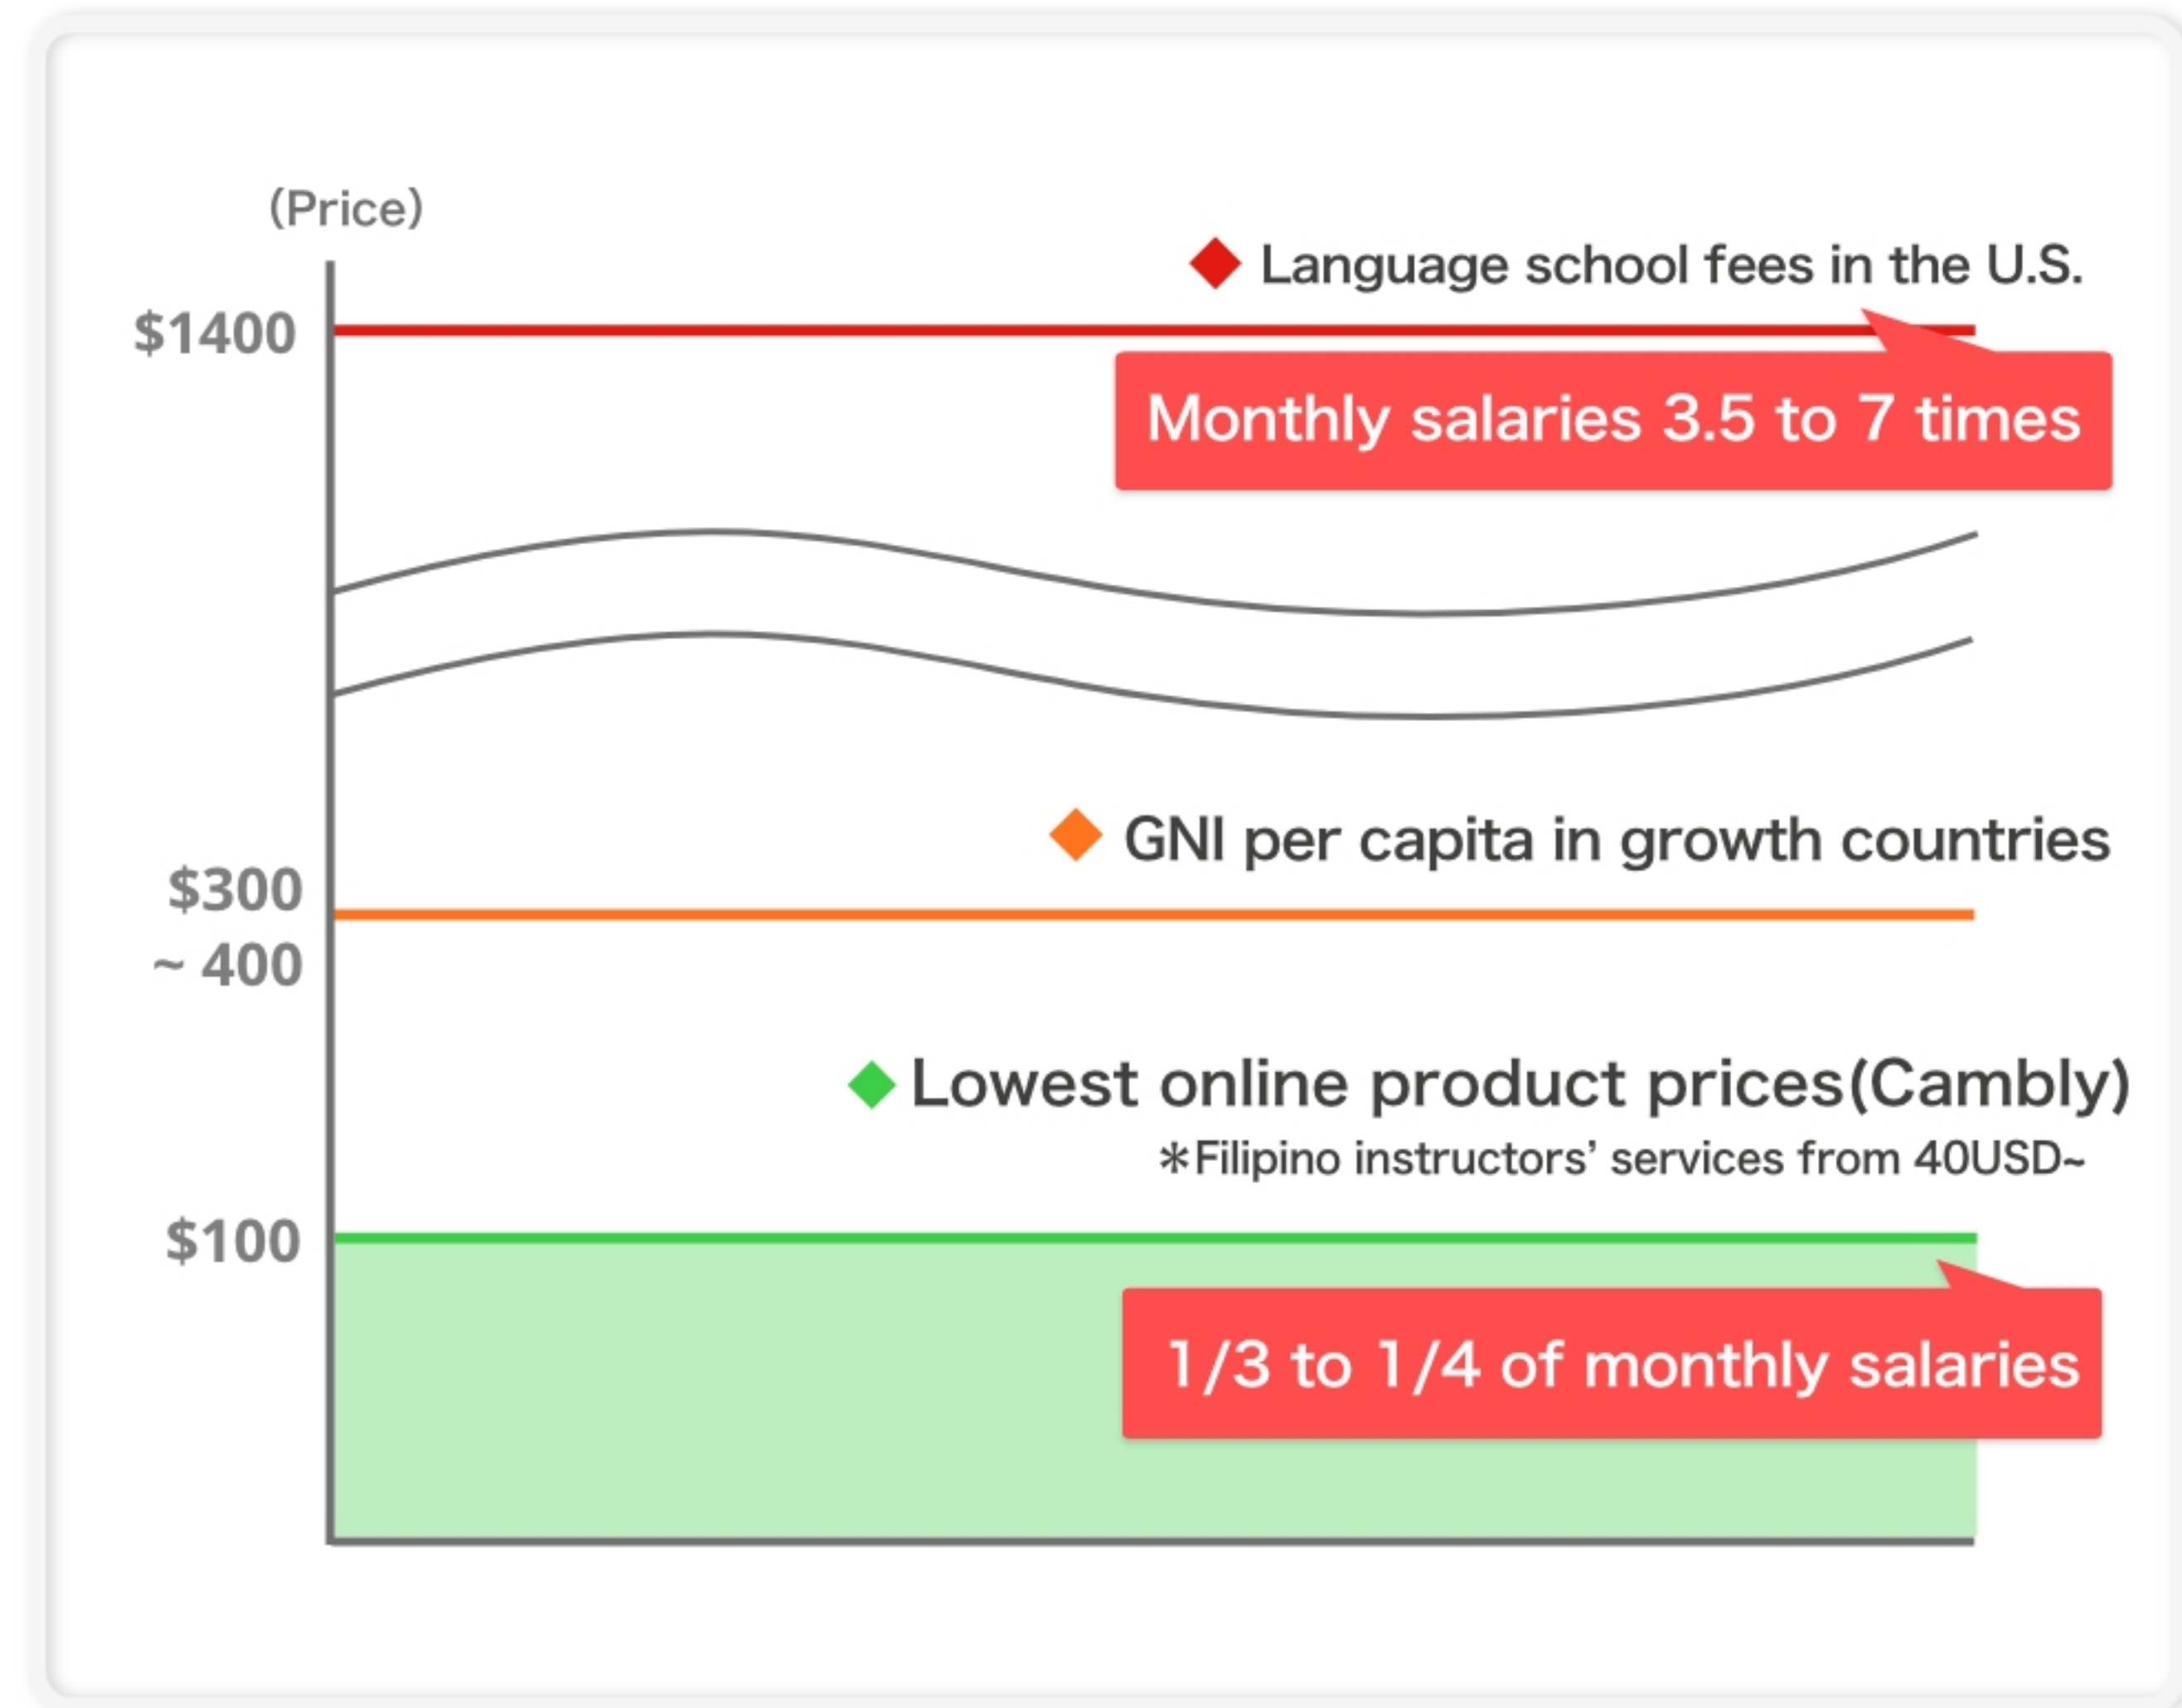

Hard to find opportunities to speak English

- English conversation learning services, including online options, involves a significant financial commitment.
- Finding conversation partners is tough, with a lower psychological barrier than Japanese learners.

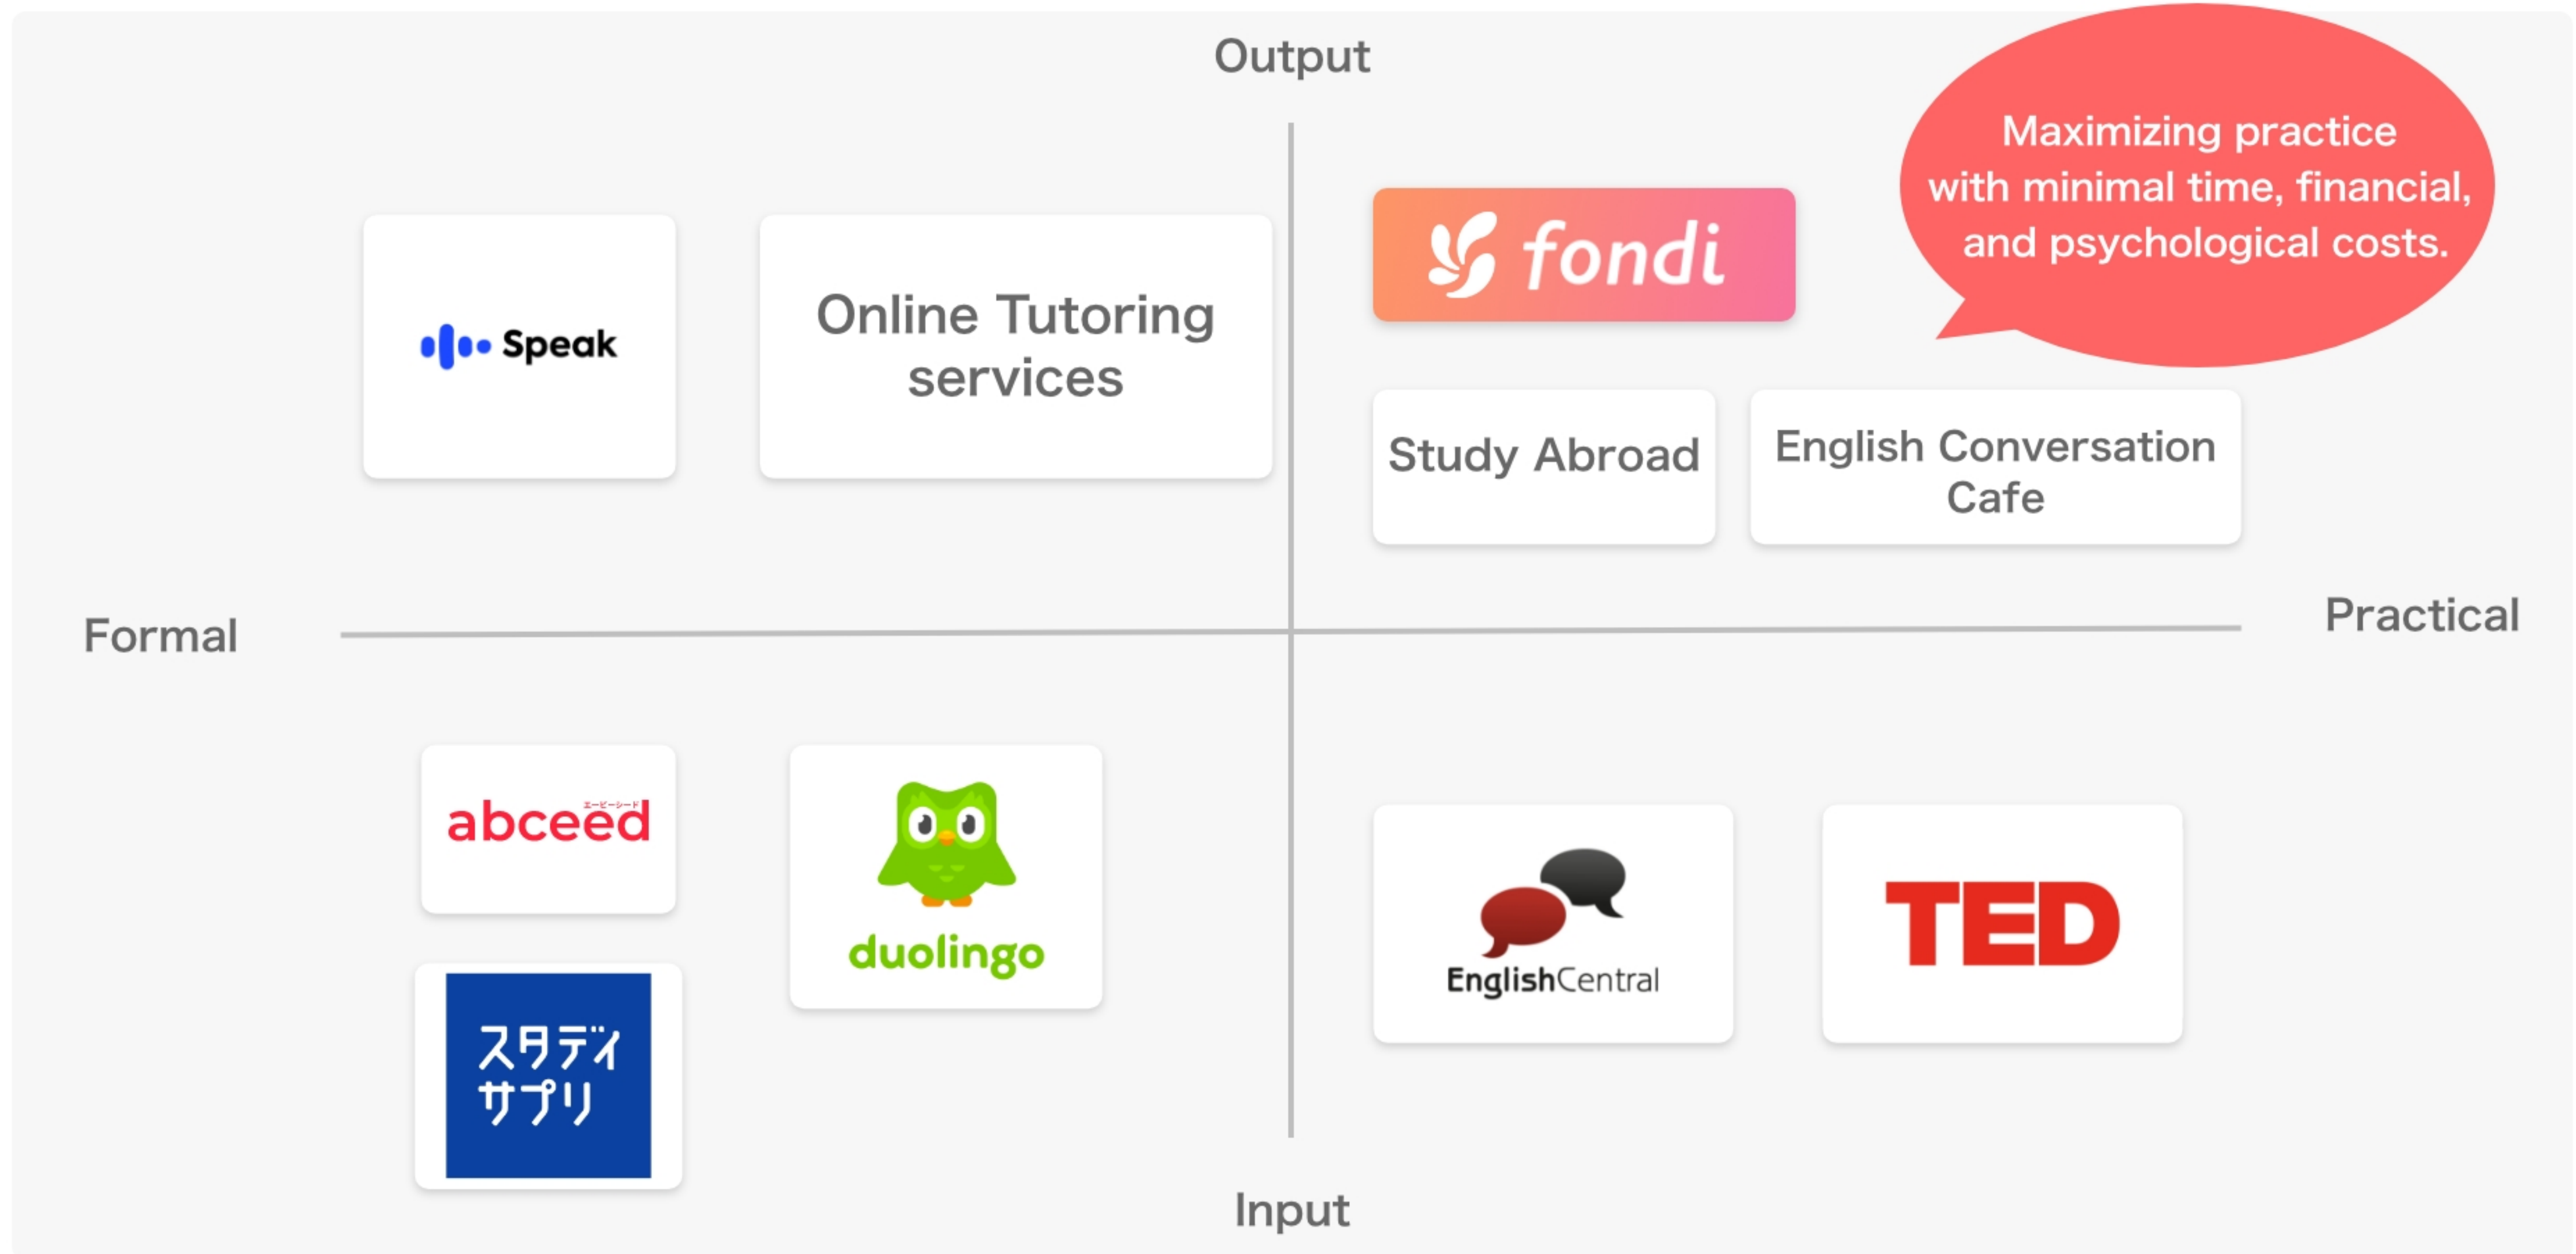

*Practice options outside major cities are limited, with commuting to city centers being congested and costly.

The context behind unfulfilled needs

- Global English lessons are costly.
- Local English classes accessible to us often lack practicality.
 - Low teaching quality
 - Focusing on group lessons

Unique Positioning in Digital Language Learning Services

Creating lively conversations

Communication Arena : Practicing English with fondi mate

Plaza

【Quick talks in groups】

Casual games enhance lively conversation

Bar

【Relaxed 1on1 talks】

Conversation topics provided by a bartender

Lounge

Future Expansion and Enhanced User Experience

How did Duolingo grow?

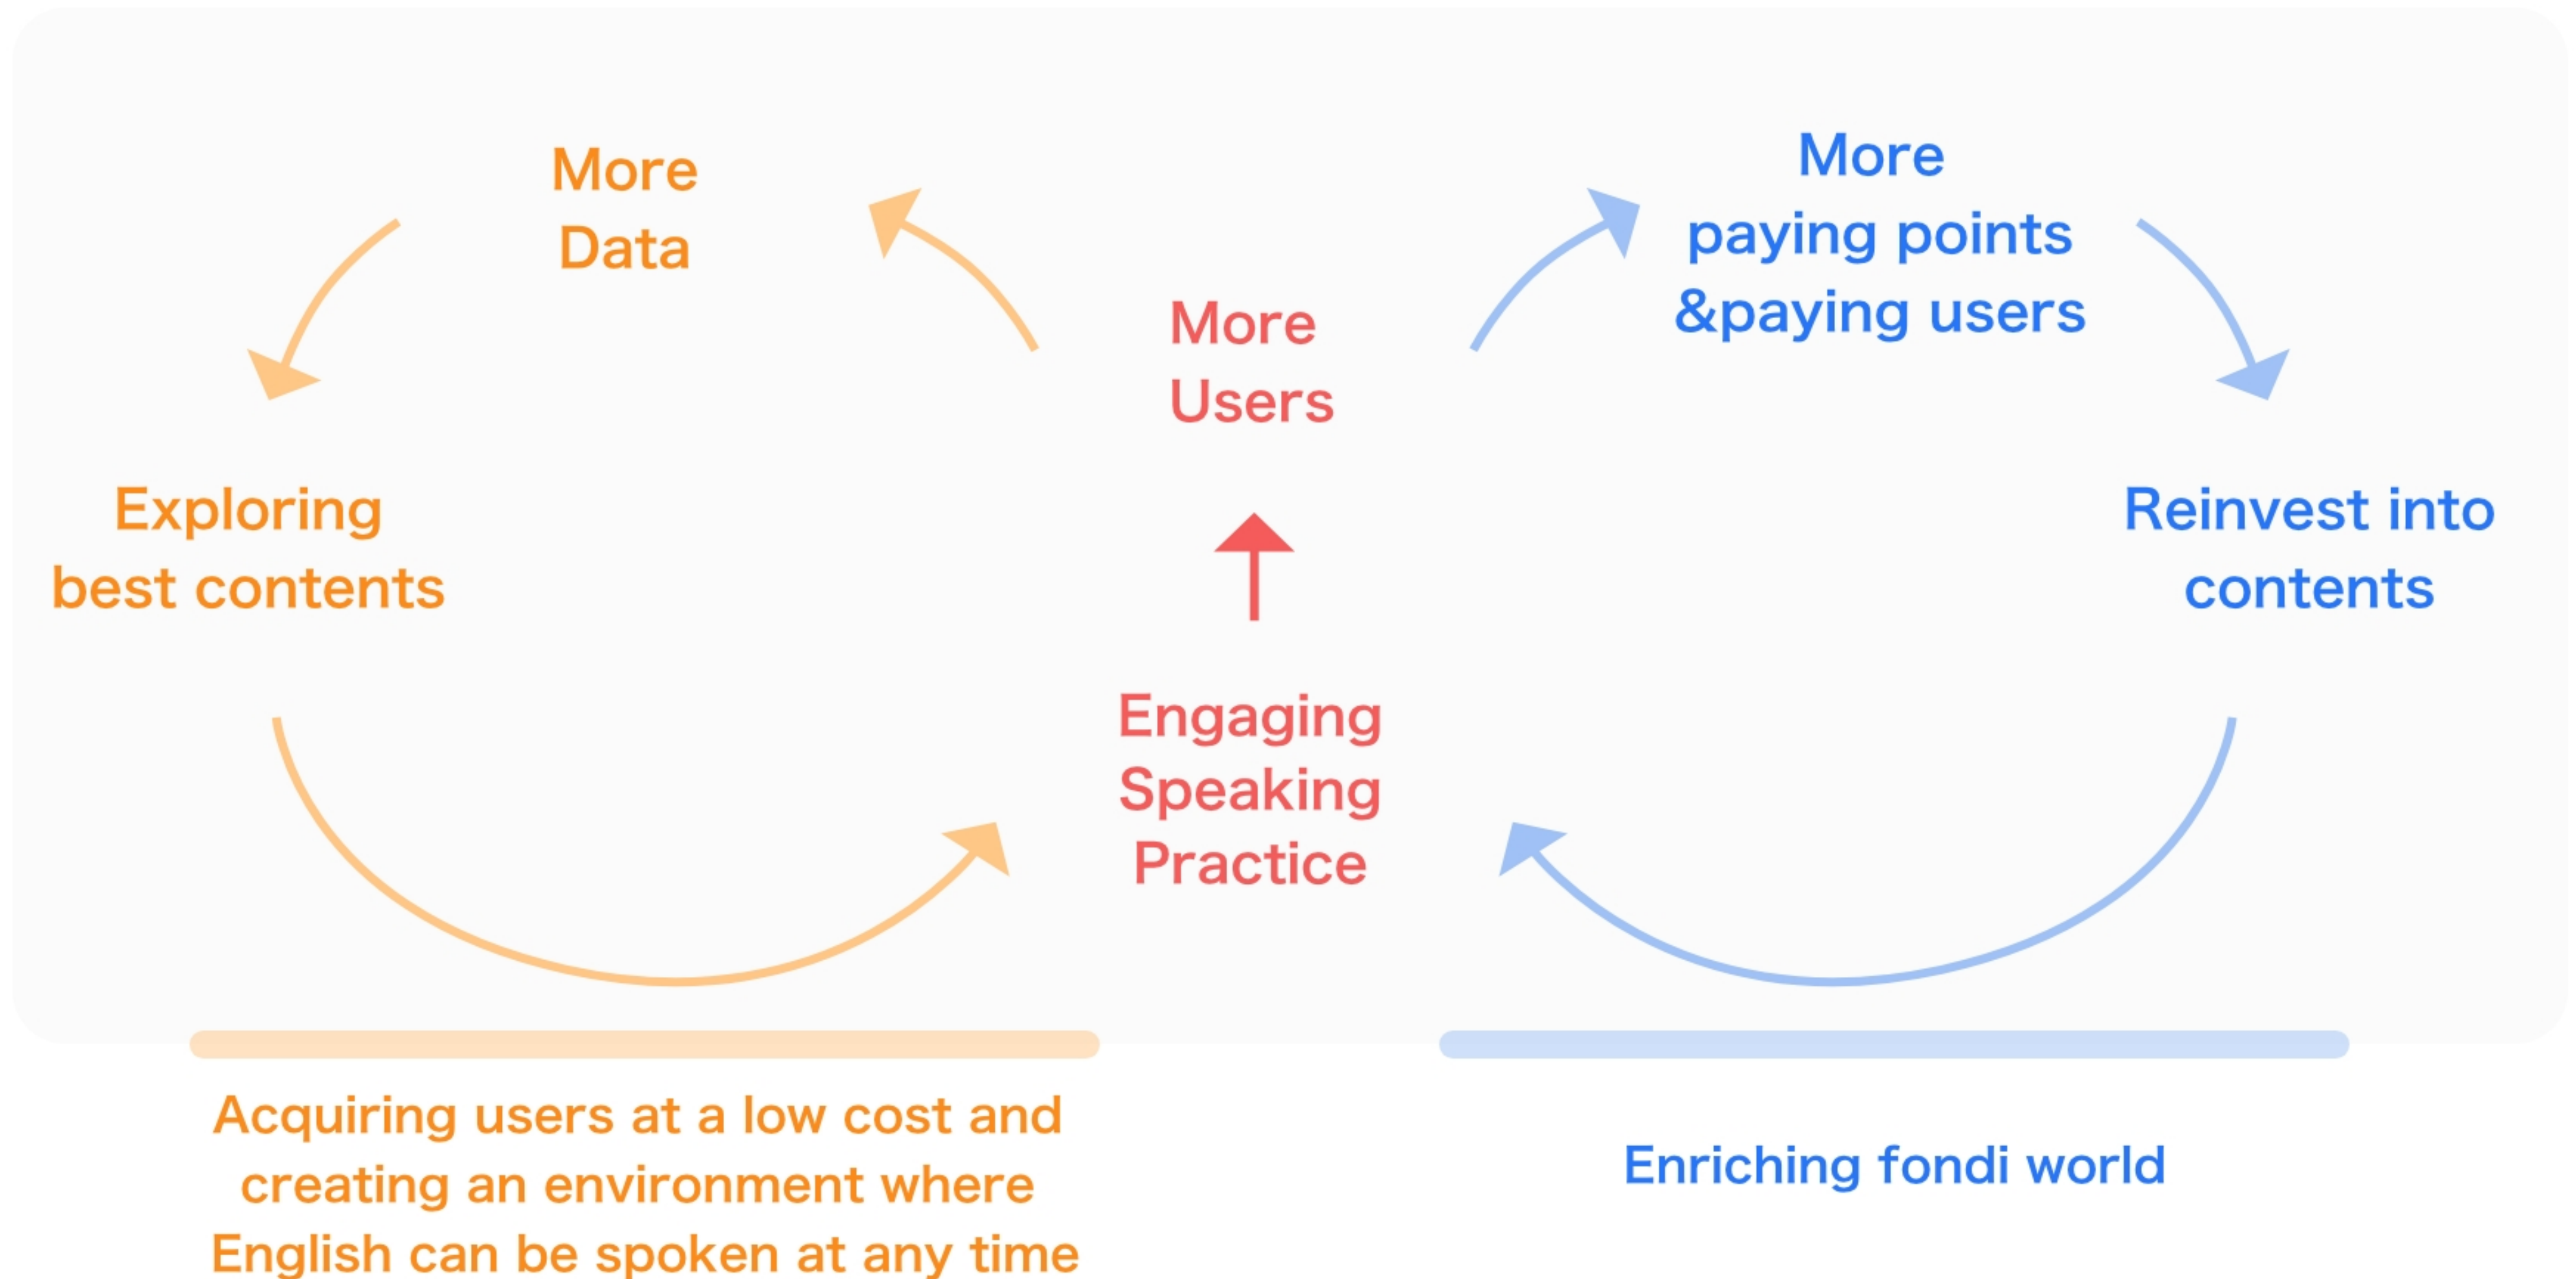

MAU exceeded 20 million before it started billing.

Powerful flywheel effects driven by strong business model

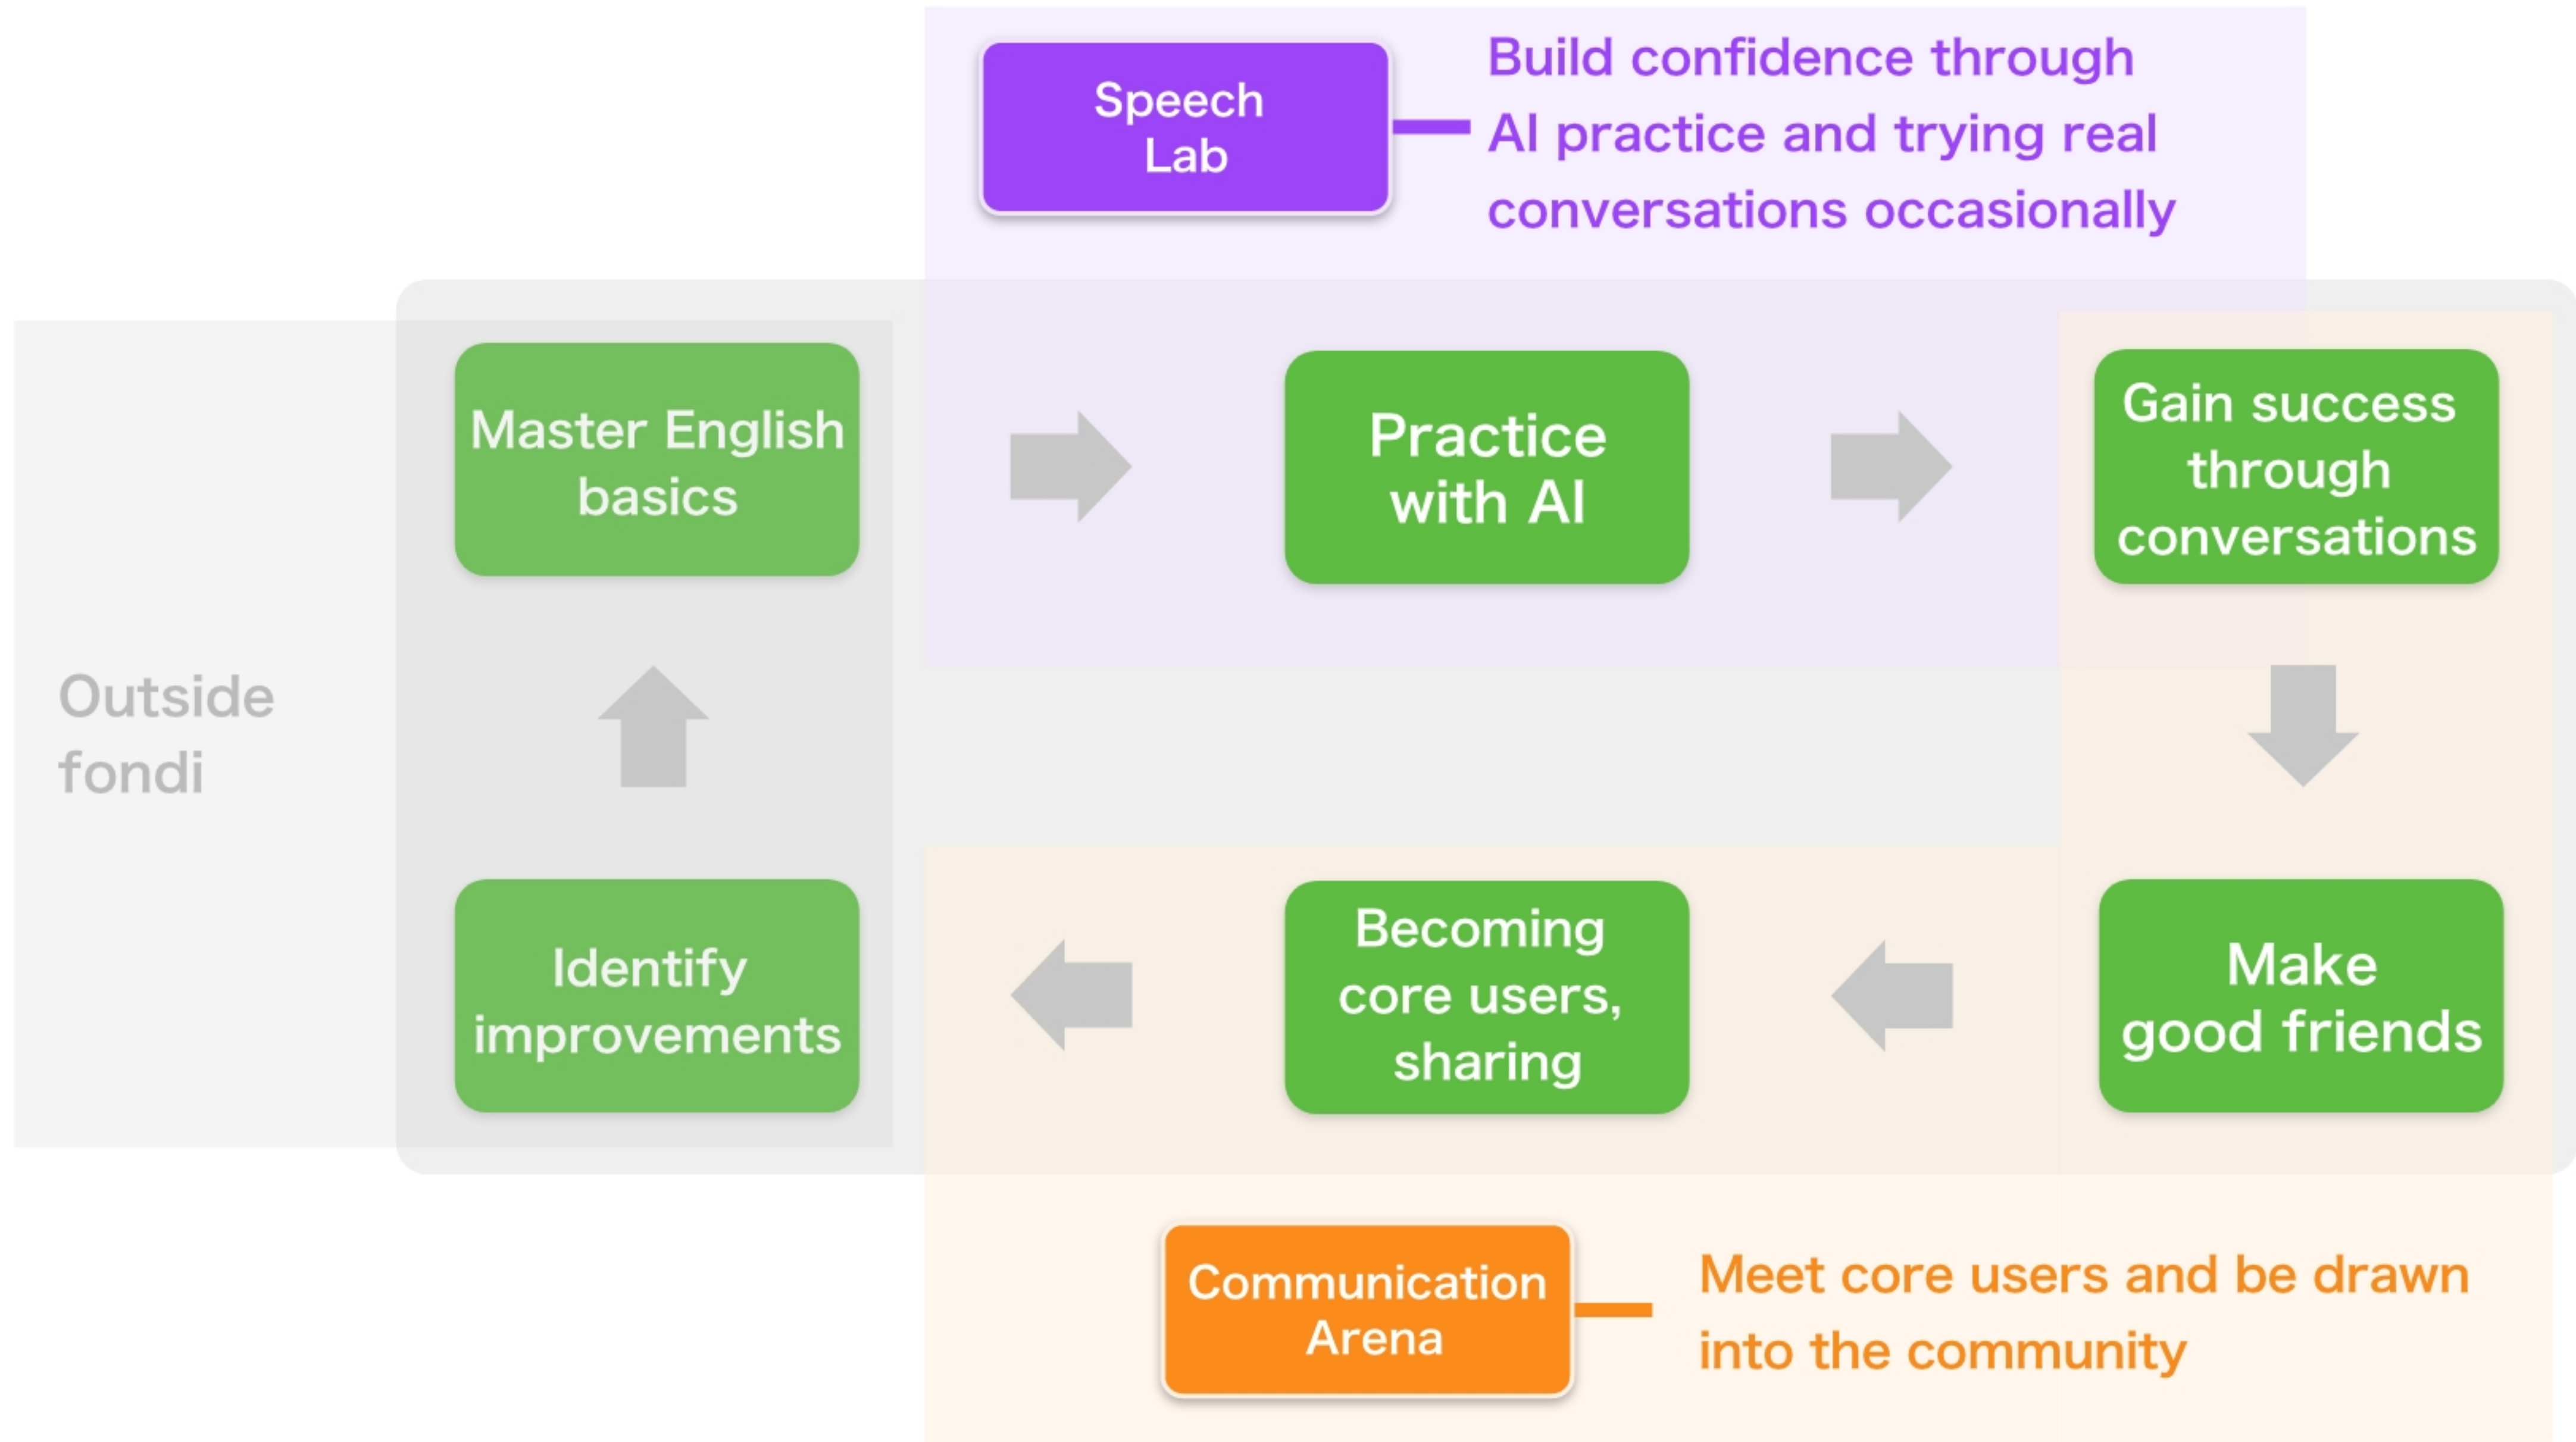

Collected massive amounts of data from free users
→ improve the user experience,
→ generated paying users for reinvestment.

fondiの成長戦略

The flow of an engaging experience

Investment focus for the next 12-18 months

Theme of “Reality x Output”:

Expand the stage for core user engagement

Findings So Far

- Chose 20,000 active users, rewarded points and badges, and initiated a campaign to encourage conversations with beginners.
- Held events with 50+ highly engaged users called “Talent” and organized themed discussions.

Increased interactions between core users and the retention of beginners who talked with core users was doubled.

Future Guidelines

Spread core users' enthusiasm across the community through the following three elements:

- Expand core users' content formats, including 1-to-N
- Design to attract attention to these users
- Increase rewards for contributions to the community

Investment focus for the next 12-18 months

Theme of “Reality x Input”:

Leverage generative AI to enrich content

Findings So Far

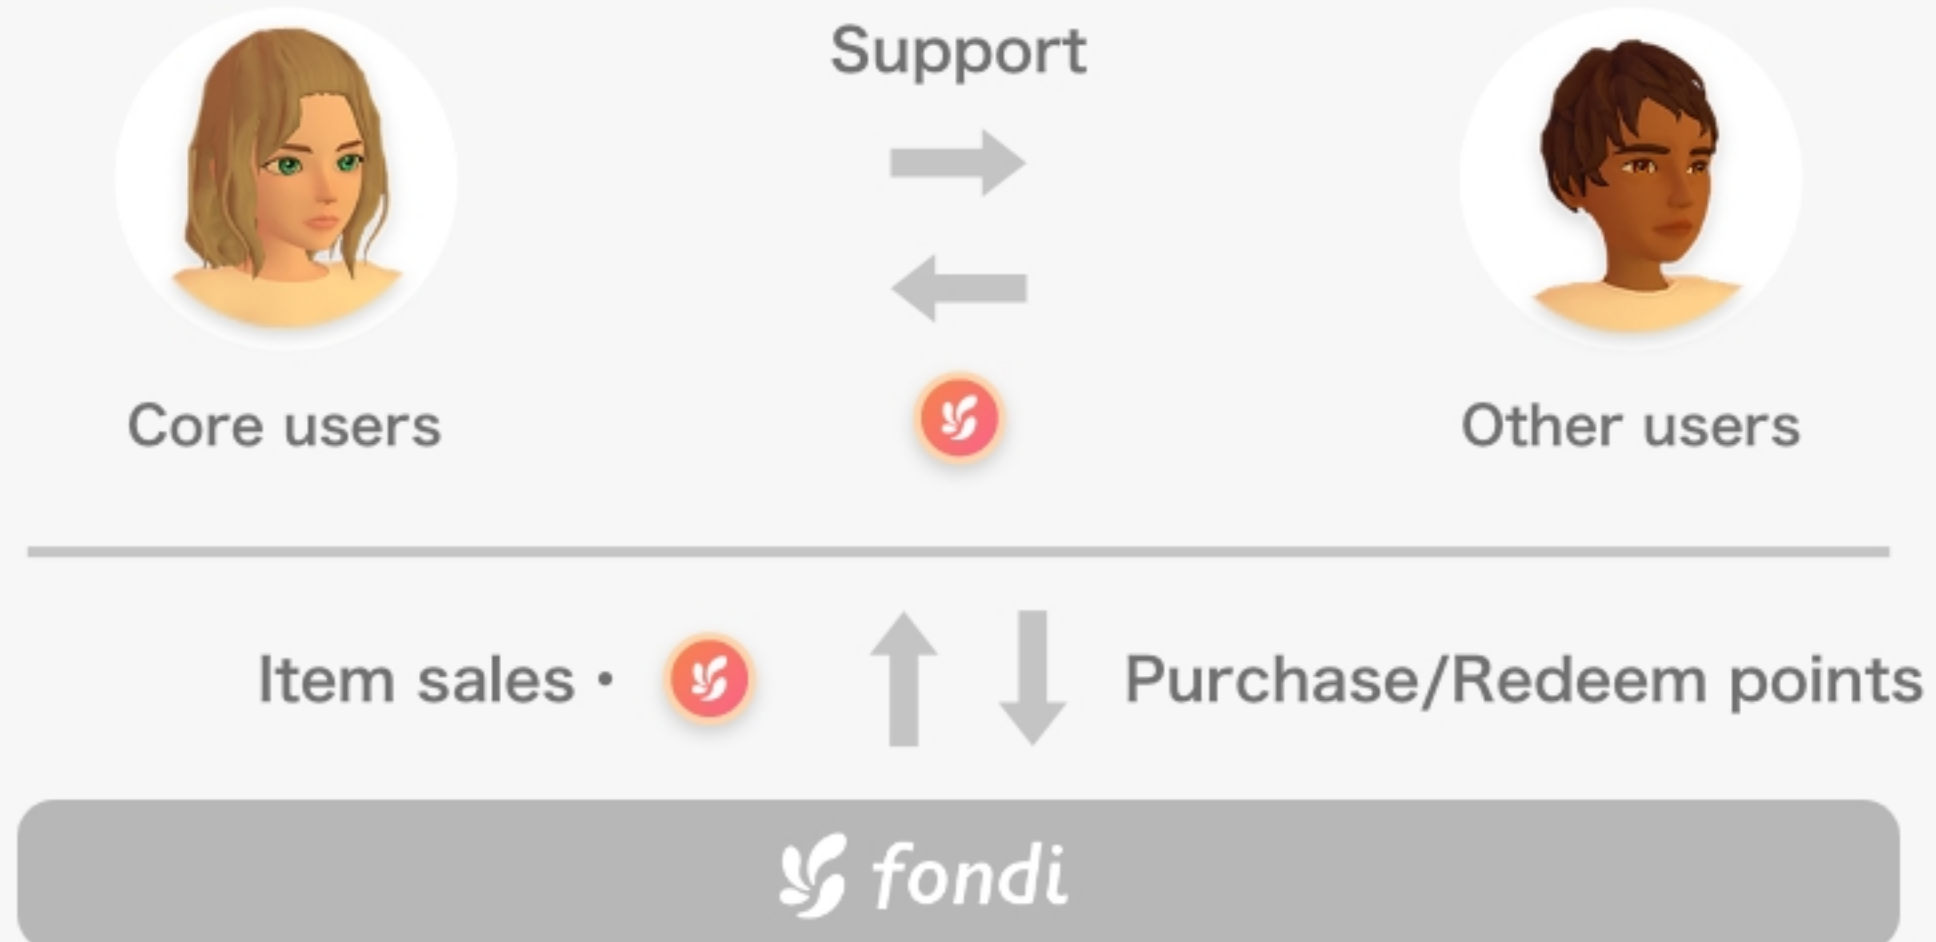

- Individuals practicing with AI can confidently engage in **face-to-face conversations for over 10 minutes**.
- Users using the “Study Abroad Area” on the first day show a **25% higher** retention rate in **the first week** post-registration.

Future Guidelines

- Customize input content based on the user’s readiness for interpersonal conversations.
- Strengthen the AI practice feature as a “Personal Assistant,” providing tailored input aligned with the user’s personality and goals/
- Enhance the role-playing feature with detailed difficulty levels, expanded missions, and the addition of 3D interactive content.

Initiating short-term validation of in-service payments

Ecosystem using an in-service currency

Specific Use Cases

- **Tips:** Users supported can express their gratitude to contributors in the community using in-service currency.
- **Purchasing in-app items:** In-service currency is used to buy items like avatar essentials, costumes, and customize rooms.

Subscription model based on in-service currency as a hook

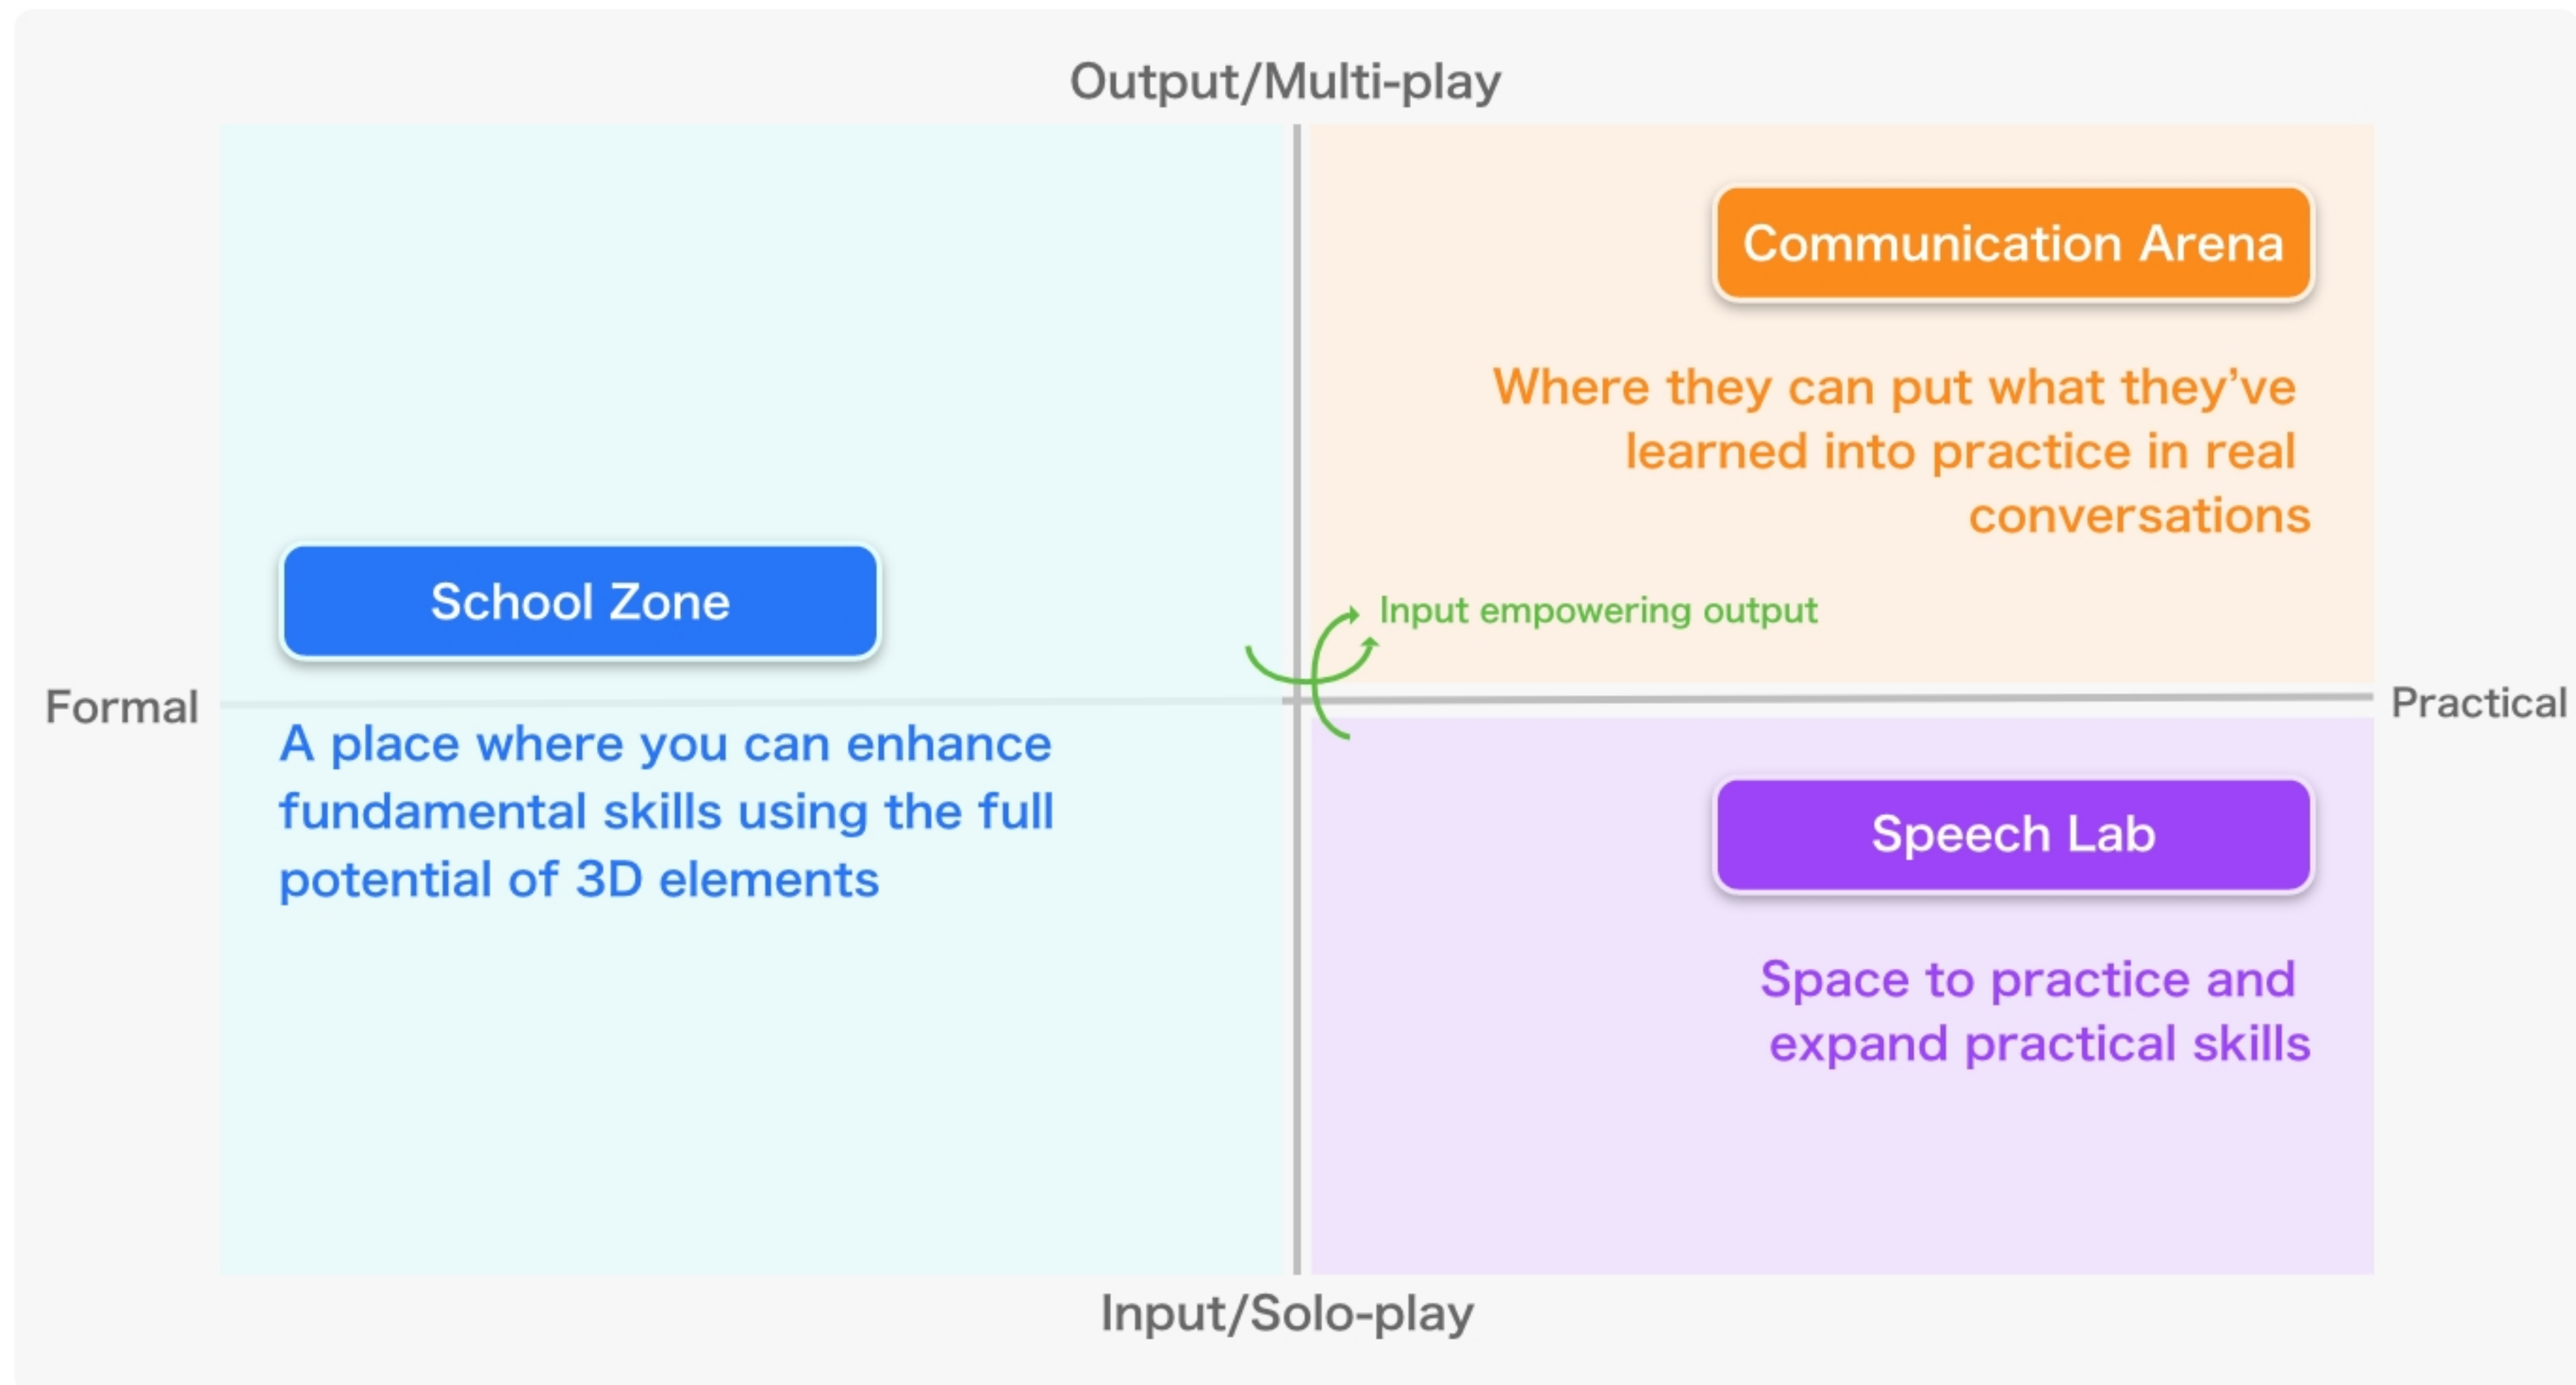

Plan to explore Duolingo models in the latter part of this phase

	Subscription	Reward ads, affiliate ads
Essential feature elements	<ul style="list-style-type: none">• Premium accounts remove ads and offer exclusive features.• Payment renewals come with in-service currency at a favorable rate for cost-effective learning content access.	<ul style="list-style-type: none">• Free users watch ads to charge the microphone battery for conversations.• Consider reward ads like AdMob and affiliate ads to encourage content usage from partner businesses.
When	<ul style="list-style-type: none">• Full verification after implementing AI-driven input features and gamification to encourage ongoing learning.• Expected around January to June 2025	<ul style="list-style-type: none">• Implement the initial version by June 2024 to understand the eCPM (cost per 1,000 views) in existing target countries• Then, continuously optimize the average views per user alongside subscription conversion rates
Why	<p>With School Zone expansion, particularly from high-value countries like Japan, Korea, and Europe, creating a stable and predictable revenue source becomes feasible</p>	<ul style="list-style-type: none">• Grow user numbers ensures consistent business referrals, fostering high profitability• Utilize certain experiential stress factors to encourage subscriptions to the subscription plan

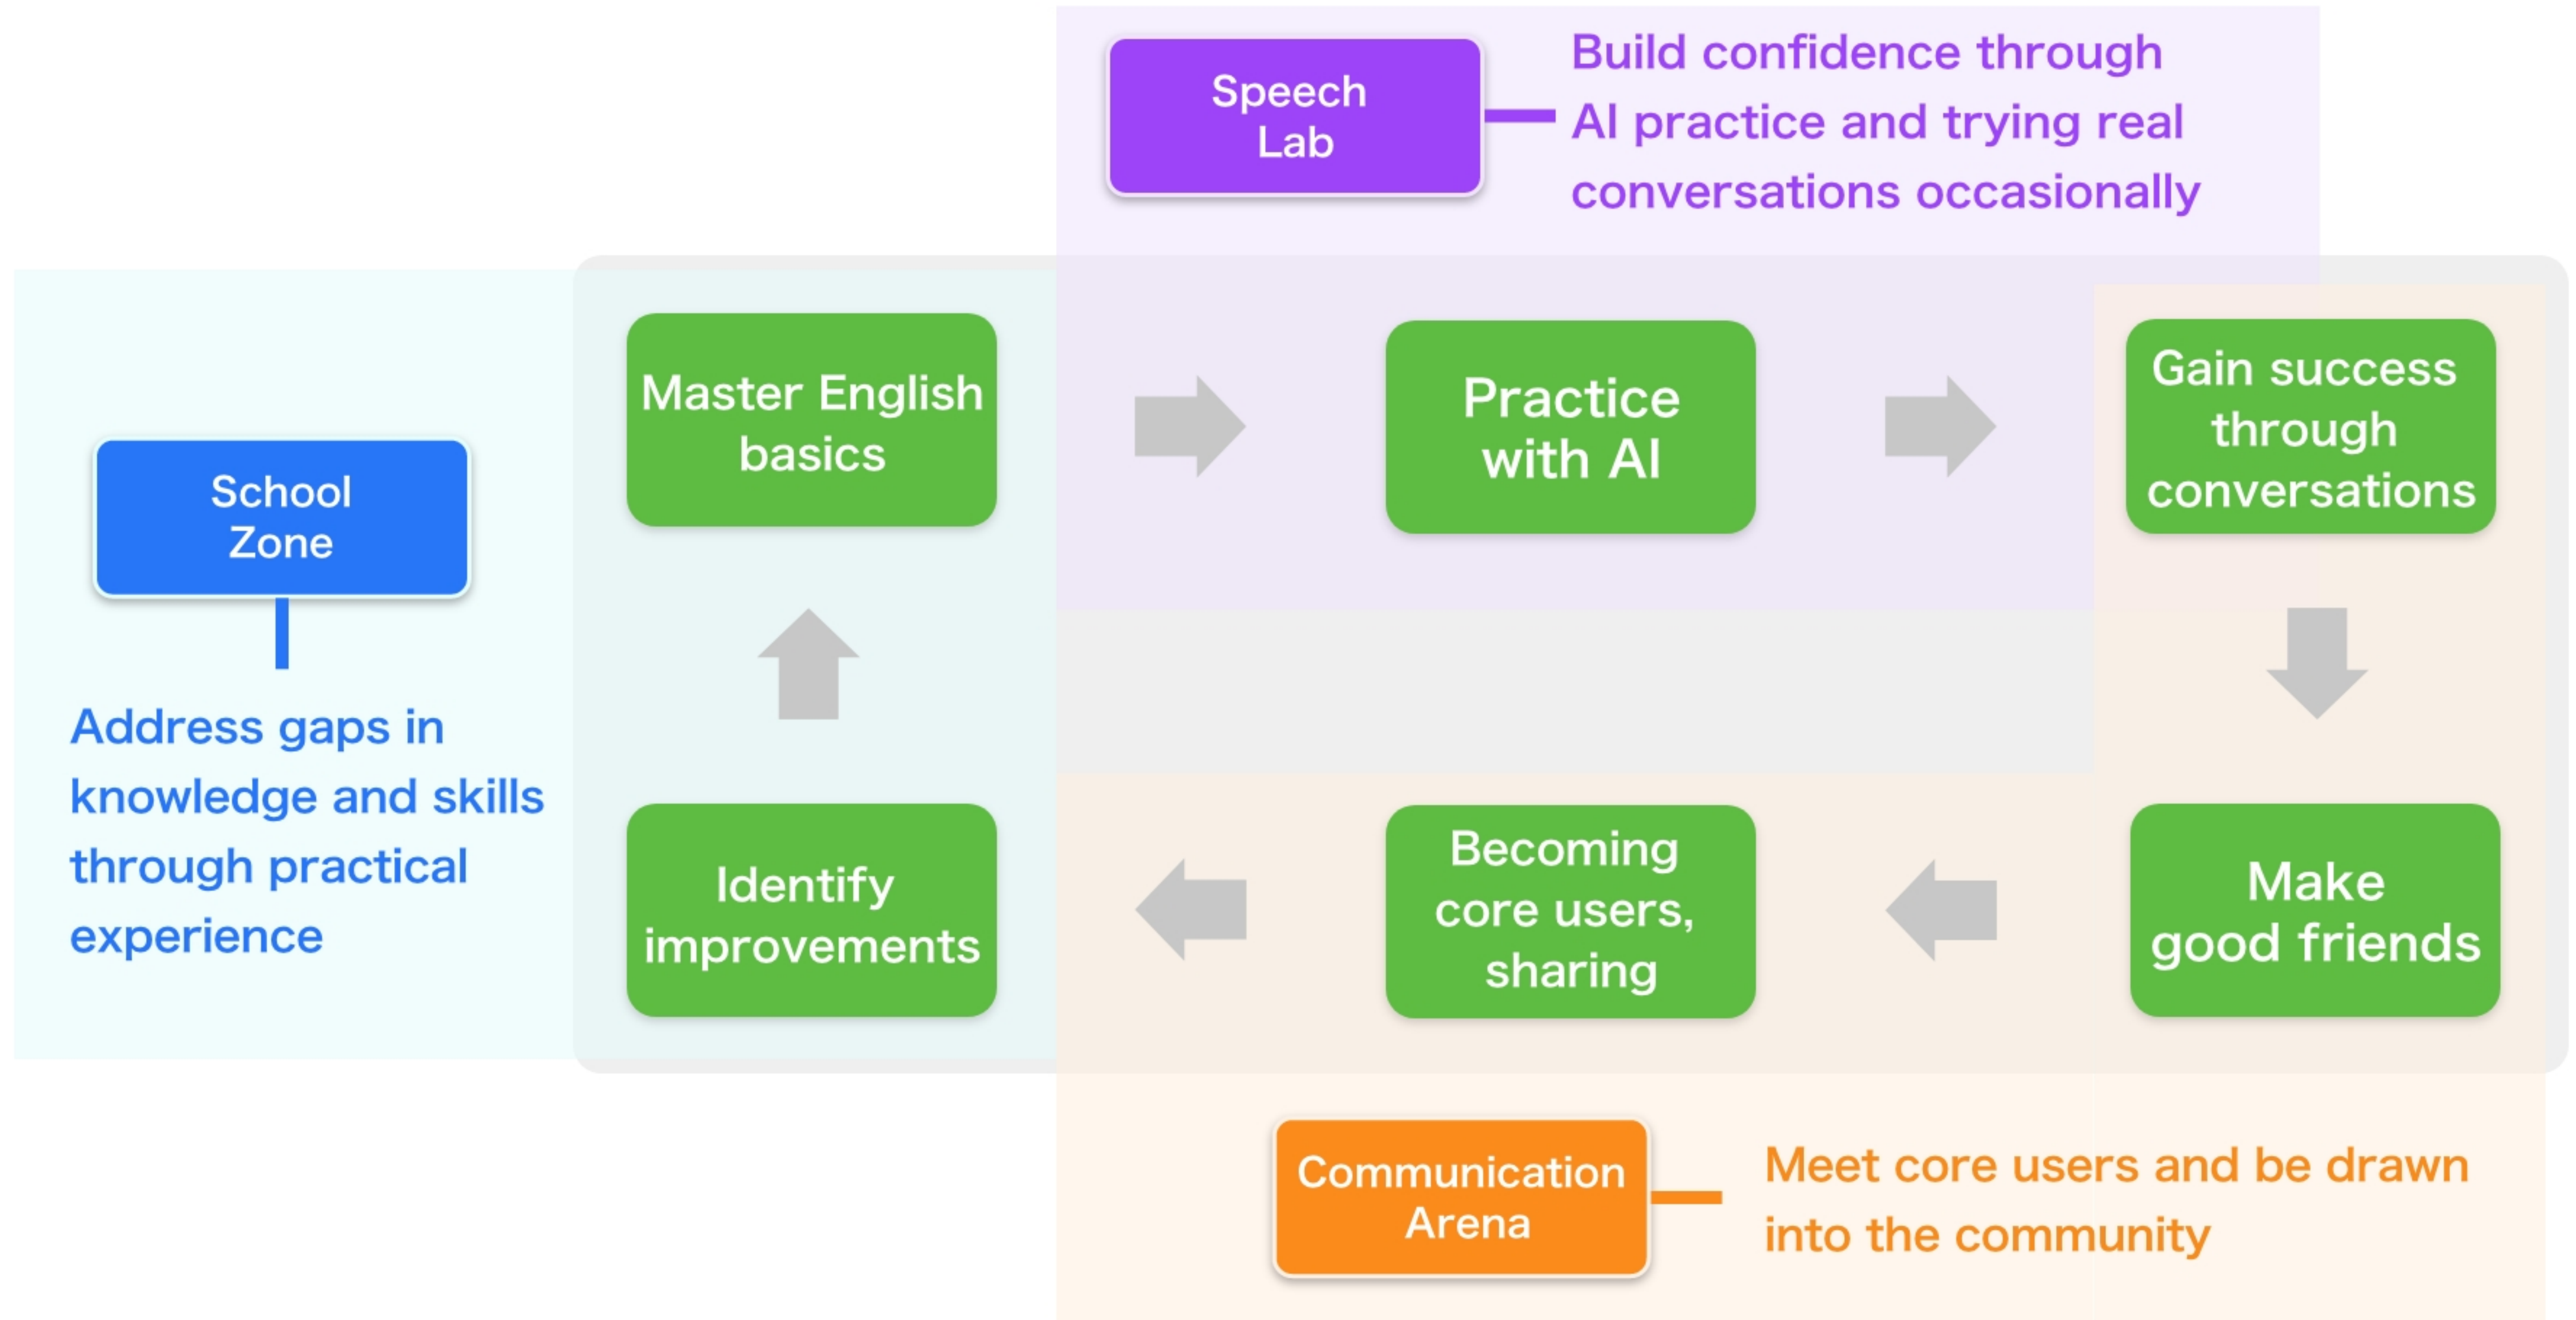

Short-term to Mid-term Business Development

Future Growth Strategy

Diverse experiences, reaching a wider audience for business growth

Envisioned ideal experience

School Zone: Summary of the experience

a “Metaverse branch” on fondi of English schools
for a unique learning experience.

Exclusive “School Space” for partners

Leverage **virtual and community aspects** for unique experiences

Package ① :
AI-powered lesson spaces and
self-study tools with **role-playing
features**.

Package ②:
Community spaces for
teacher-student connections and
international user matching.

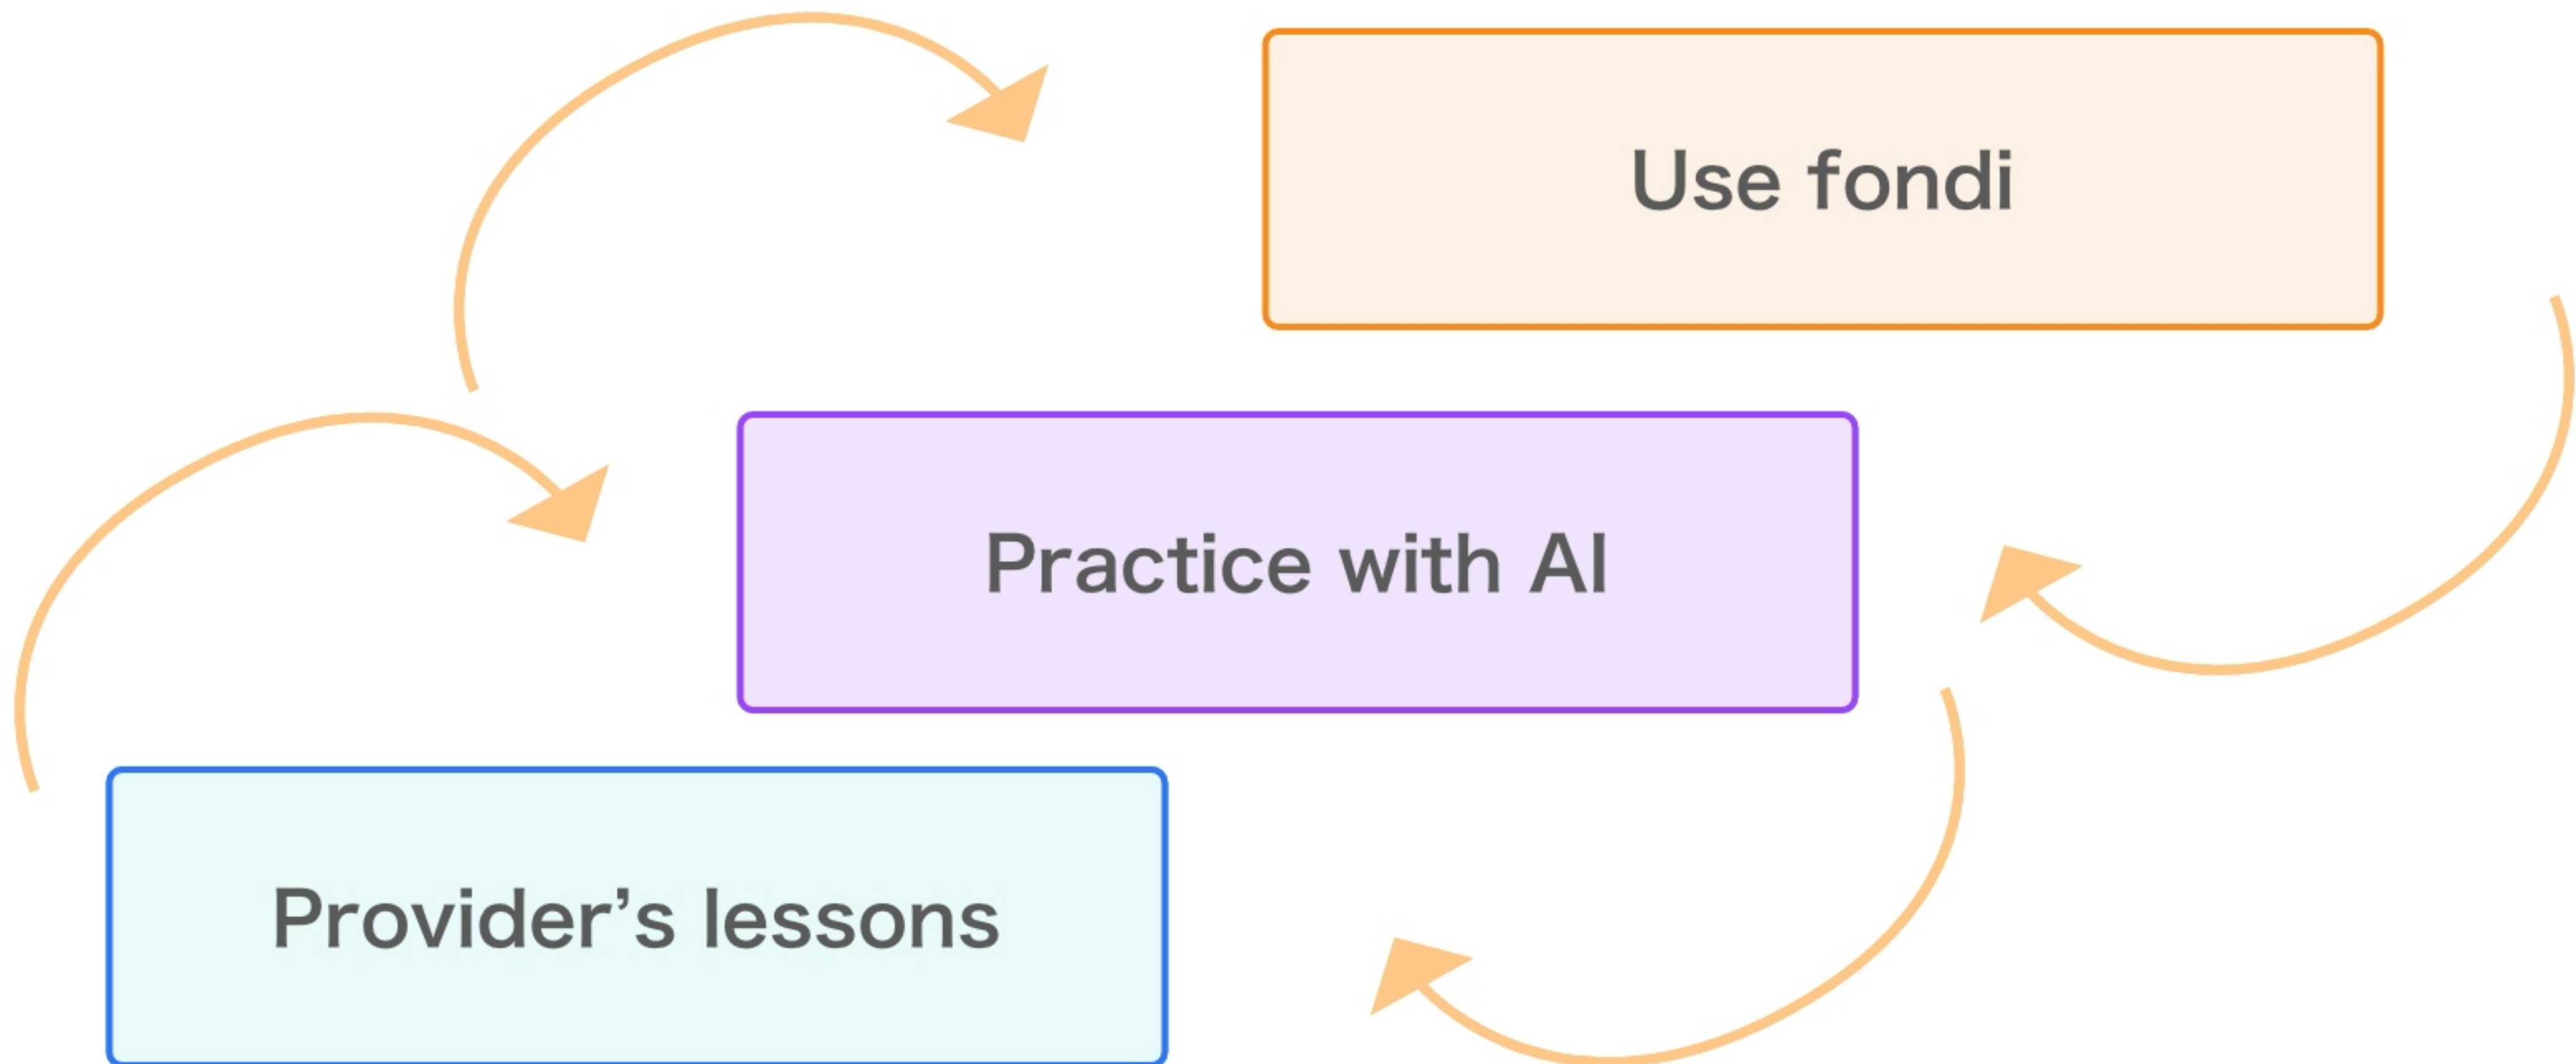

fondi commiunity access

Practice lesson phrases in
real-world scenarios.

Assign activities on fondi, like
“Chat with XX people,” as
interactive homework quests
for students.

School Zone : Value for English conversation providers

Boost retention and loyalty through the input-output cycle

Expansion plan for School Zone

Open School Zone to the public

Open the space

End users
on fondi

School Zone

- Compare experiences from various providers
- Explore free trials from chosen providers

Areas for each provider.

- Pay for access to each provider
- Explore experiences from each business

- Provide end-users access to their preferred business's school space, allowing for free trial lessons and seminars.
- Position fondi as a handy "comparison site" for trying out various services.

Unlock learning tools

English-proficient
core users

Support through tool usage

Users seeking
study partners

Belong to the operational community

- Core users actively engage in the community, supporting English learning through facilitation — a new form of "skill-sharing."
- Create a unique community space, enjoy role-playing together, and offer meaningful learn experiences without prepared materials.

Conducting preliminary exploration with minimal resources

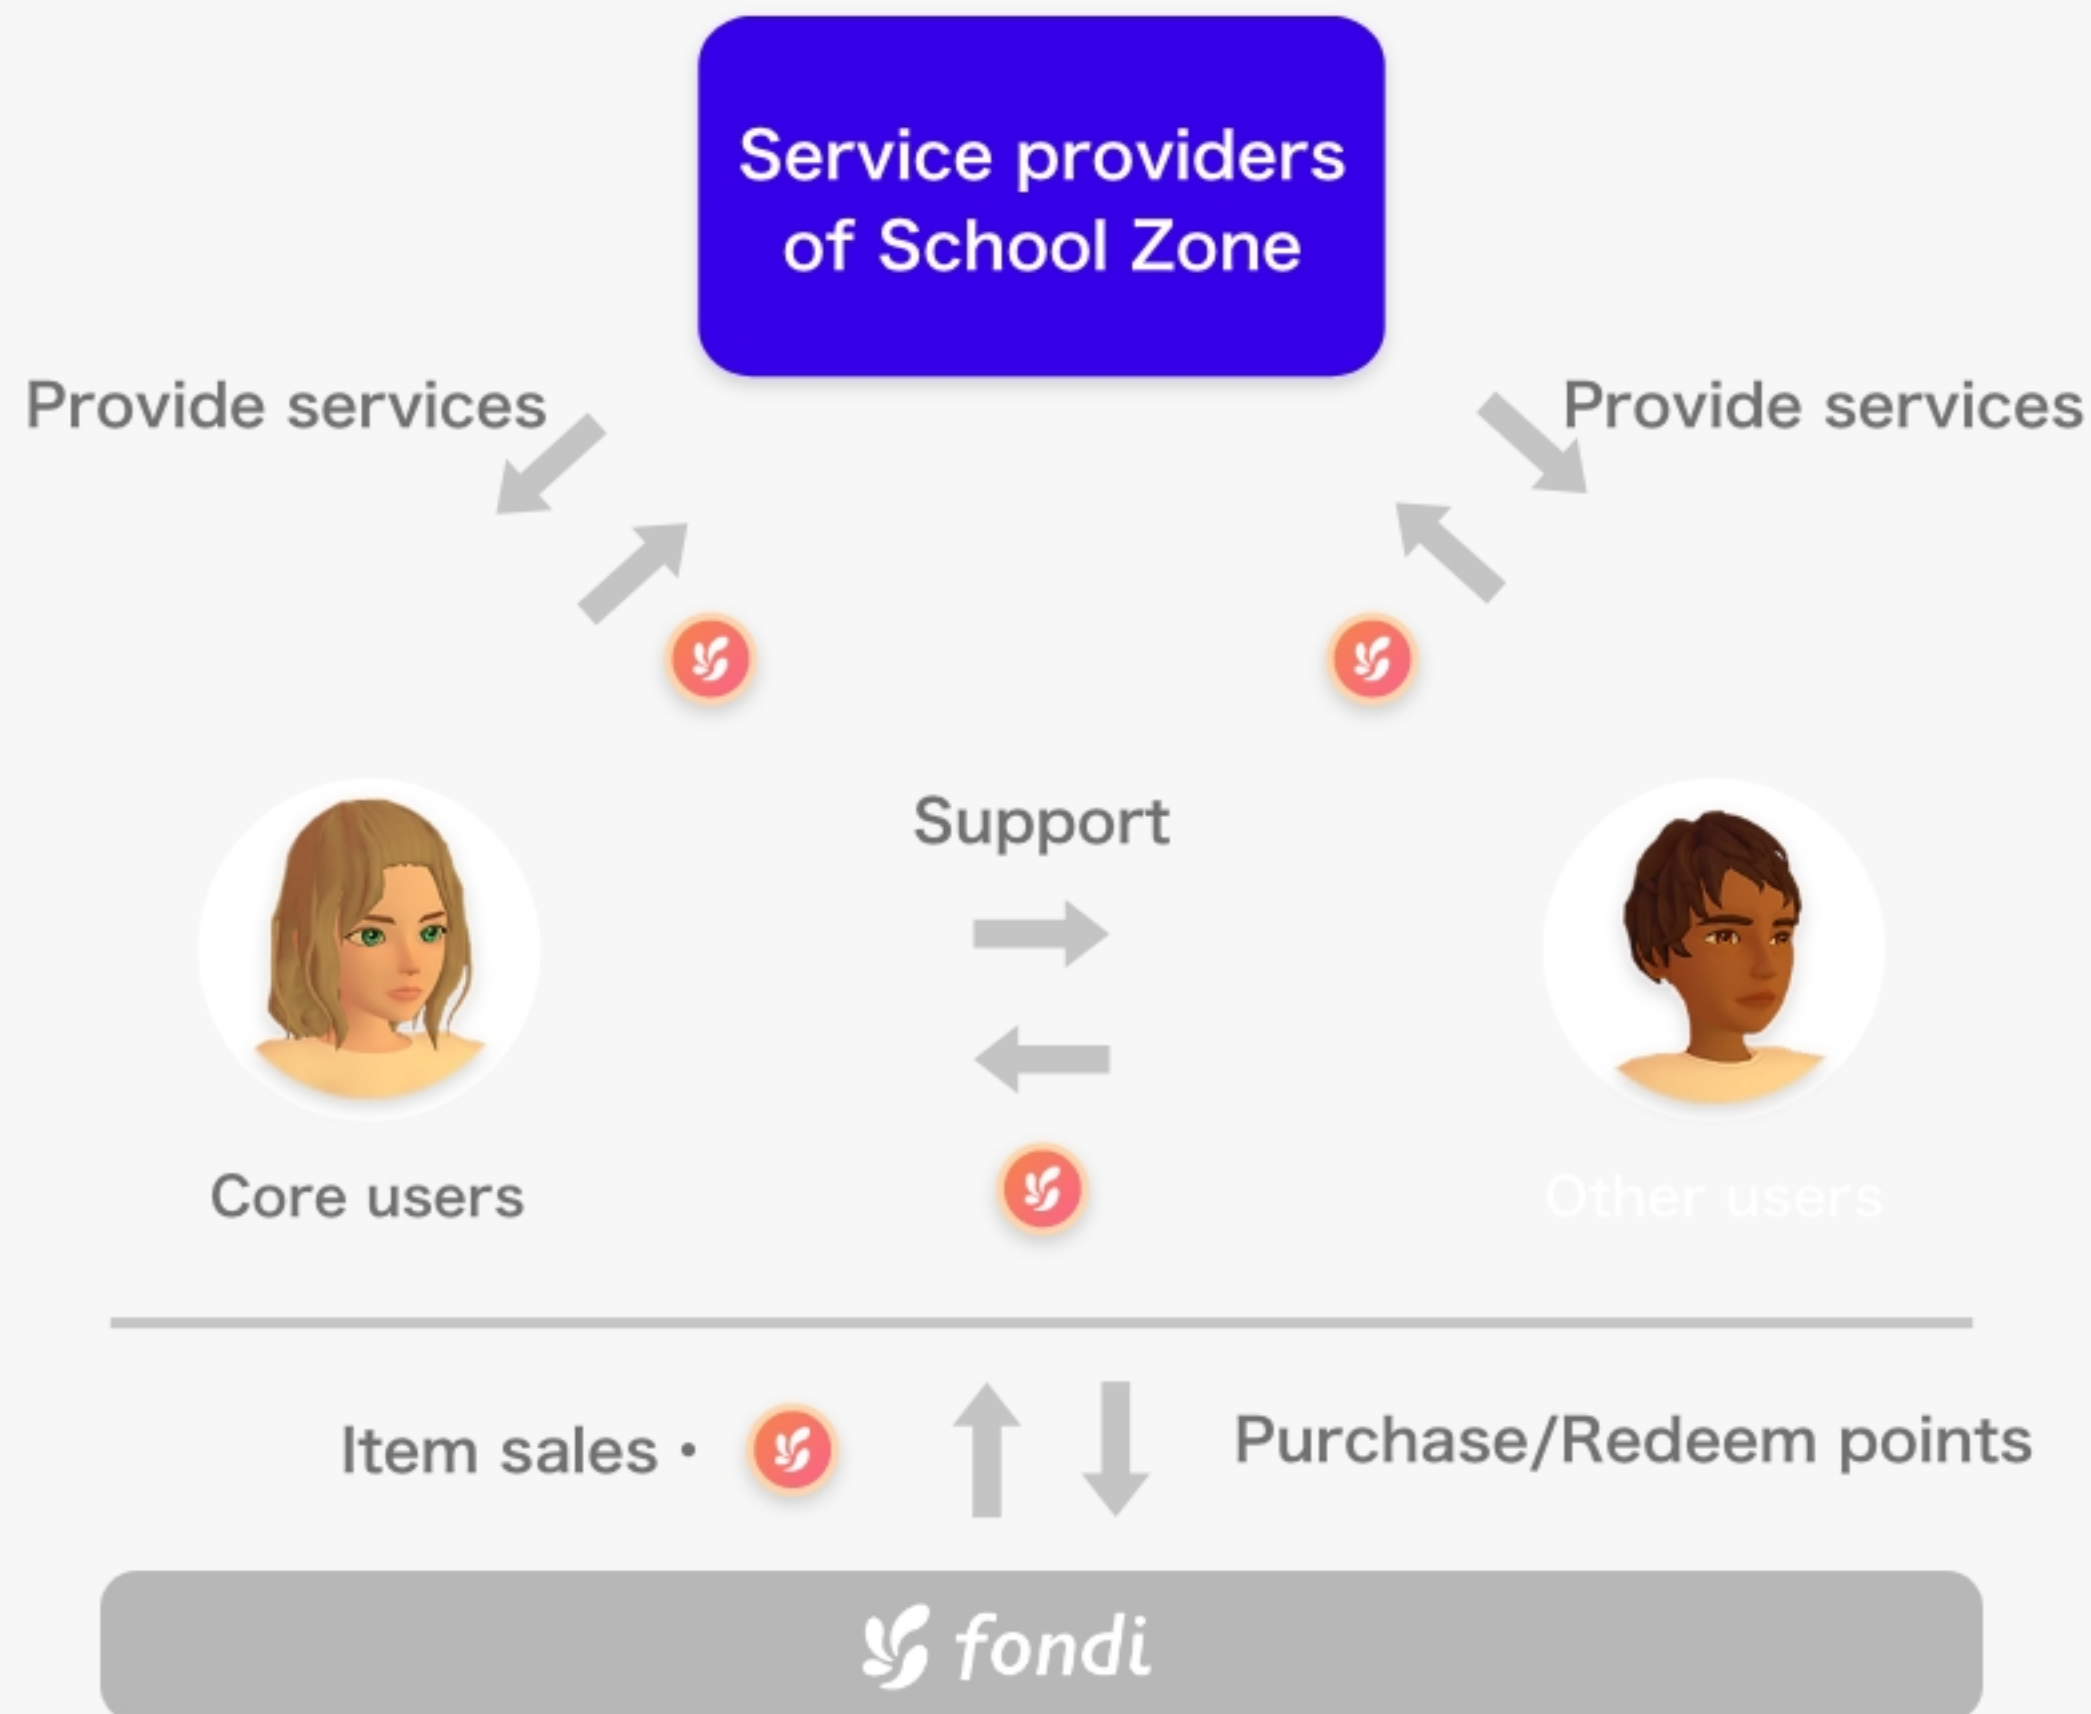

Closed deals	Offered services	Projected revenue/status
 W.Arrows International School	All-inclusive feature packages for international schools	<ul style="list-style-type: none">• \$30,000 for development fee, targeting a March-end delivery.• Will be offered to up to 100 students, including 70 existing ones and additional recruits, at a rate of \$18 per month.
 TORAIZ トライズなら、1年で英語が話せる。	Provide a platform on fondi for students to engage in discussions and practical exercises as part of the ongoing coaching program	<ul style="list-style-type: none">• \$3,500 for development fee, completed delivery• Performed PoC with 15 existing students, will fully expand in February, and offer the service to 500+ students at \$12 per month.
	Preparatory content for studying abroad with a focus on fondi's role-playing features	<ul style="list-style-type: none">• \$10,000 for development fee, targeting a March-end delivery.• Will provide the service to a portion of the 800 monthly study abroad enrollees, planning to charge around \$80 every 6 months. (About 100 users, ¥800,000/month)
 中央大学	Integrate features and community of fondi as an English learning tool for the university beyond regular classes	<ul style="list-style-type: none">• Started by offering accounts for free currently• "Virtual Study Abroad" program are scheduled to begin in the summer of 2024.

Driving in-service currency transactions with School Zone

Ecosystem using an in-service currency

Specific Use Cases

- Tips:** Users supported can express their gratitude to contributors in the community using in-service currency.
- Payment for learning contents:** To advance, users use earned or purchased currency for additional content from service providers.
- Purchasing in-app items:** In-service currency is used to buy items like avatar essentials, costumes, and customize rooms.

Strategy for building a business model with School Zone

Up to now :

Build community & develop product infrastructure

- Established a space for global English enthusiasts to practice confidently.
- The core value addressing English educators' challenges and the reason to adopt fondi.

Over the next two years :

Develop a profitable app without relying only on fundraising

- Obtain money from **companies in developed nations** to enhance contents and diversify user base.
- After modularization, reduce initial costs and promote adoption by businesses in growing economies.

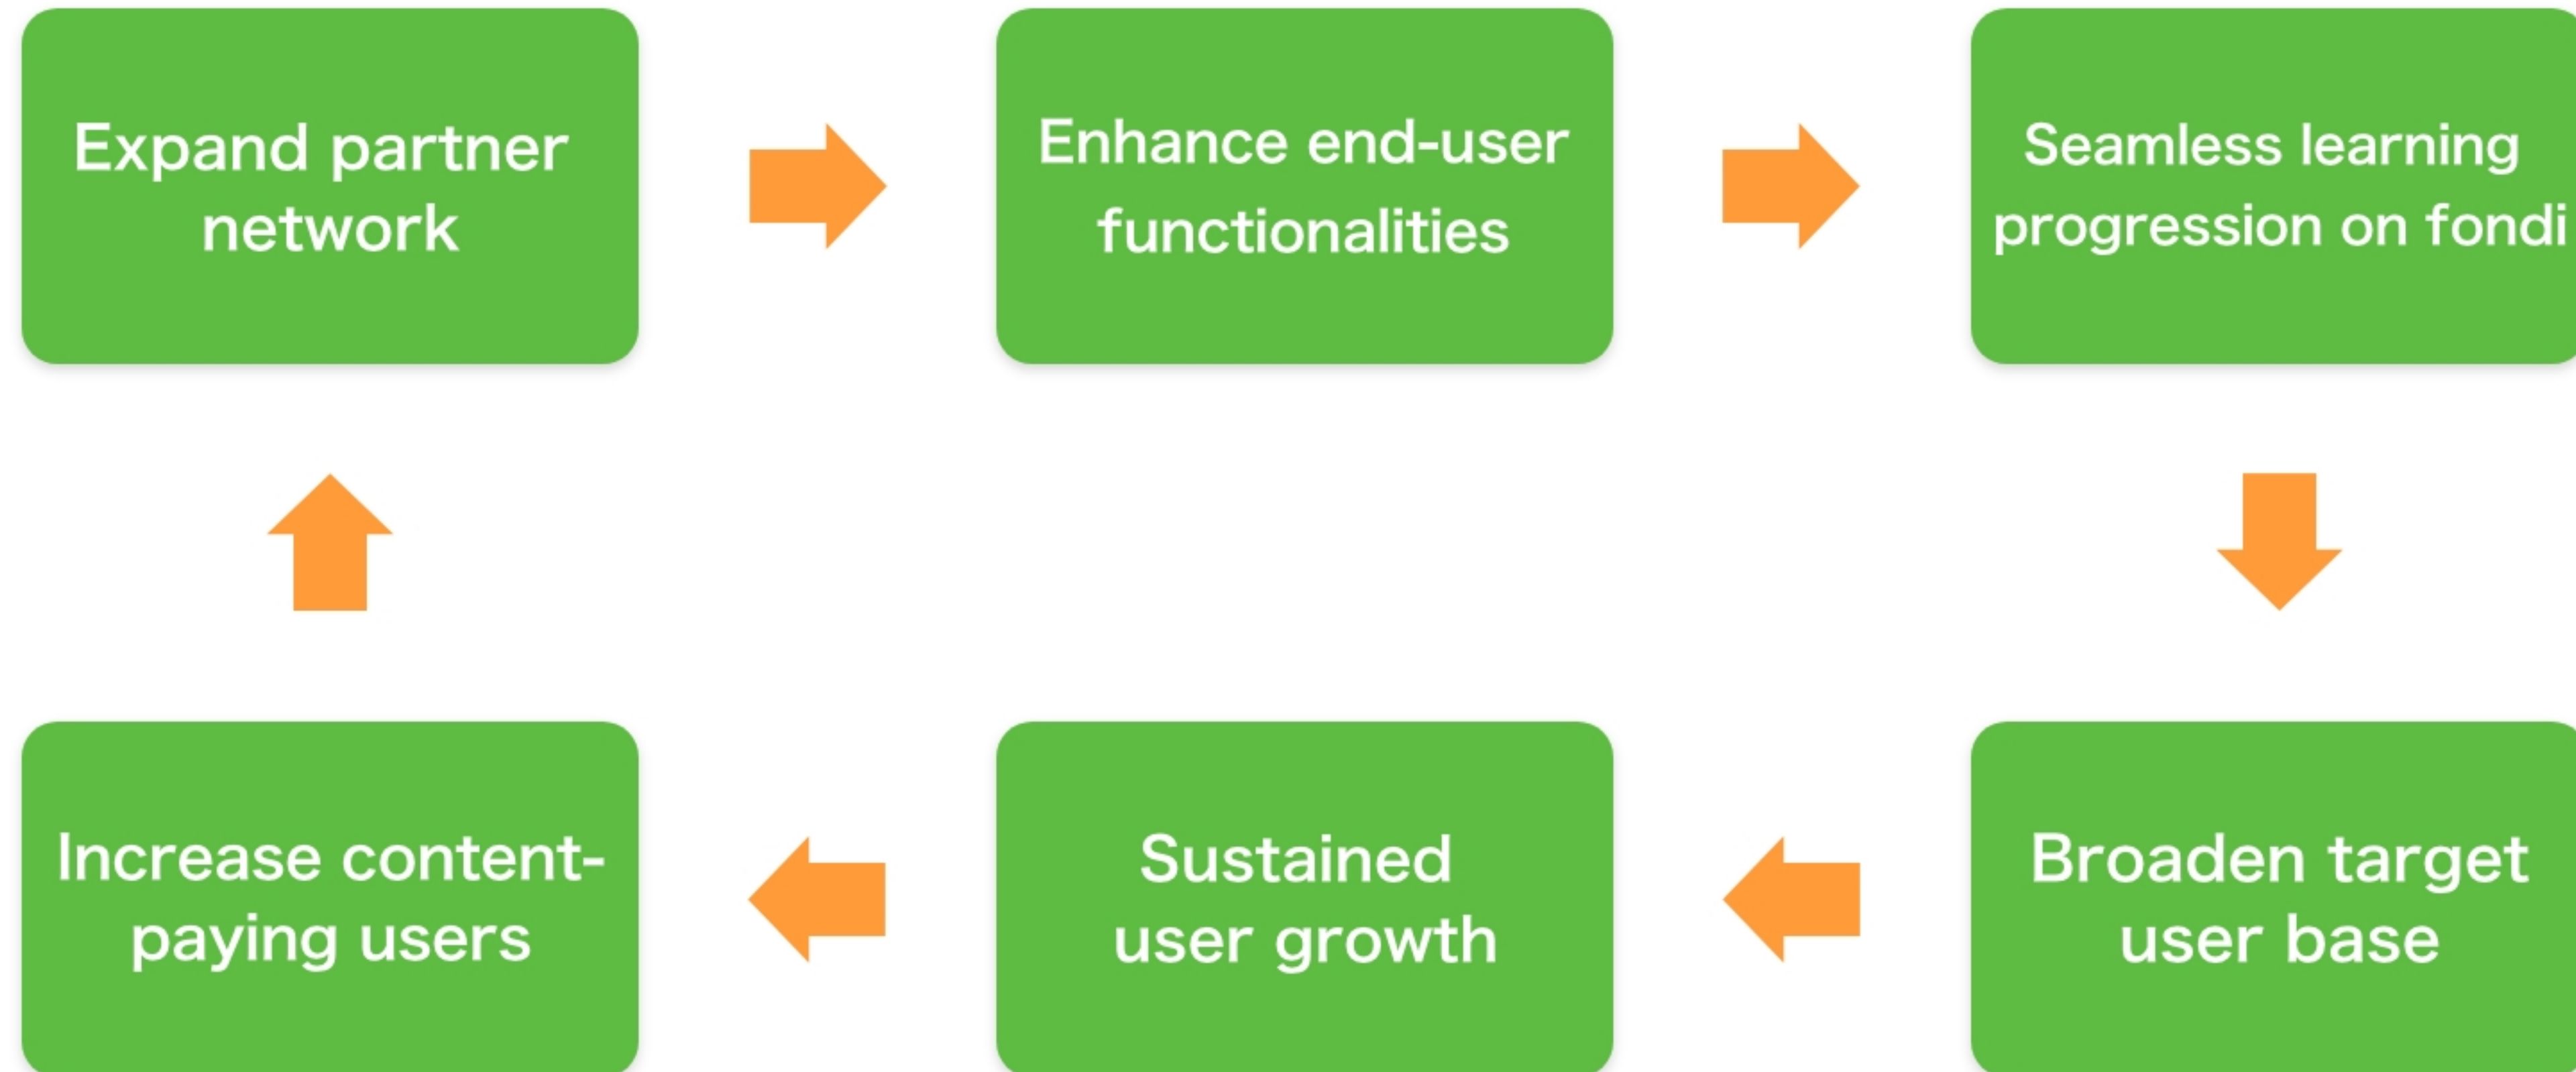

Ultimate goal :

Explosive growth, To C-focused

- **Open School Zone to the public**, focusing on to C transactions for key revenue.
- B2B expansion globally is expected to contribute as a key driver to improve the total user experiences.

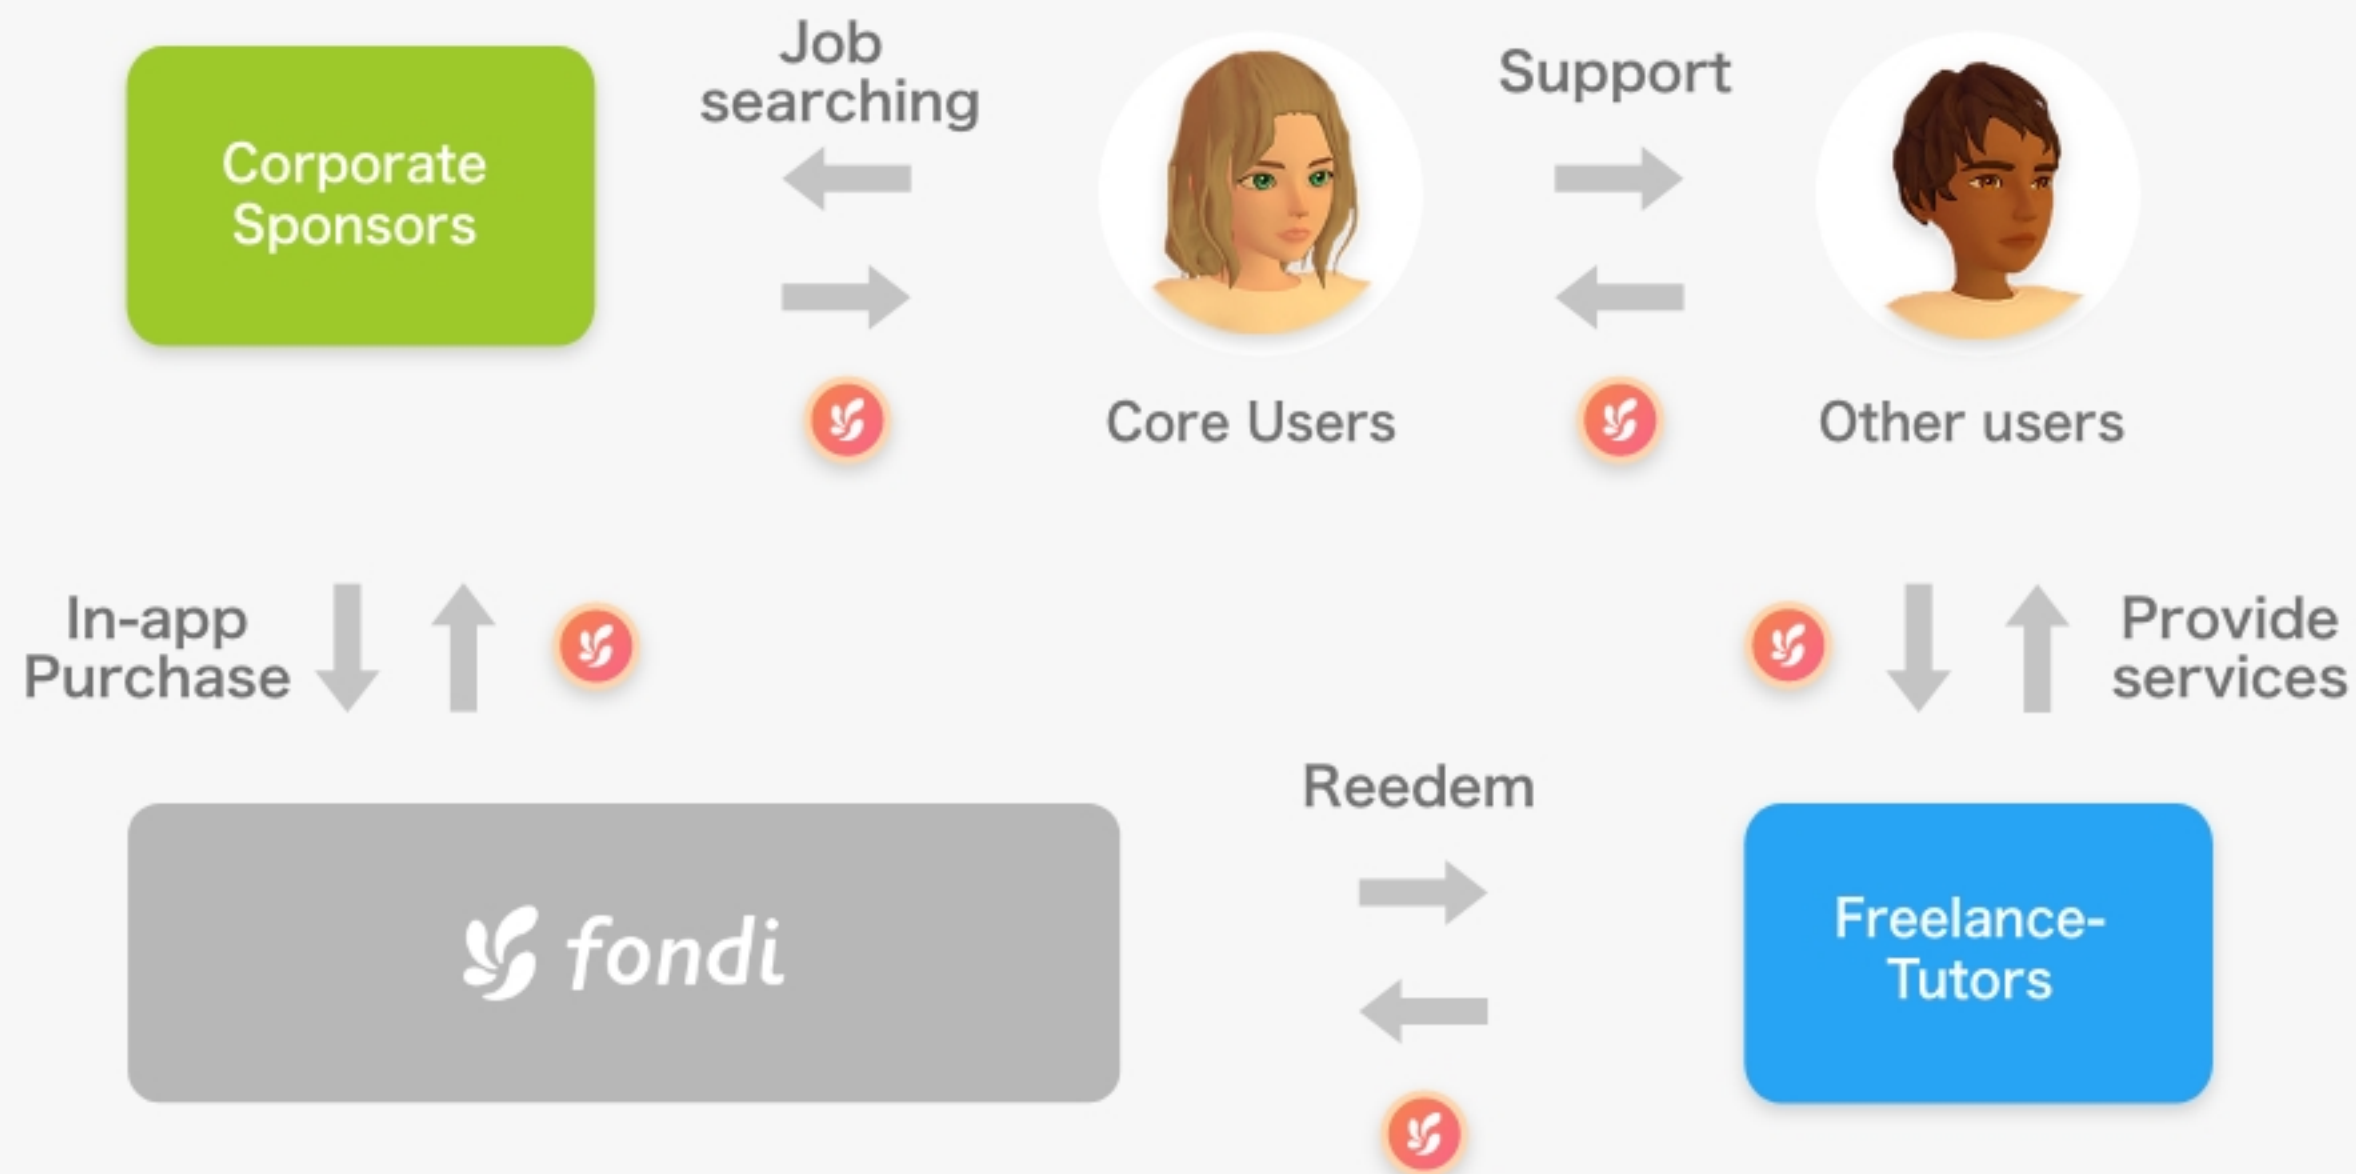

Developing for C2C and B2B enhances the product's value

Expand partnerships drives the growth in service value and scale

Future vision of the in-service ecosystem

Platform that transforms lives through English

Expansion into Career Services

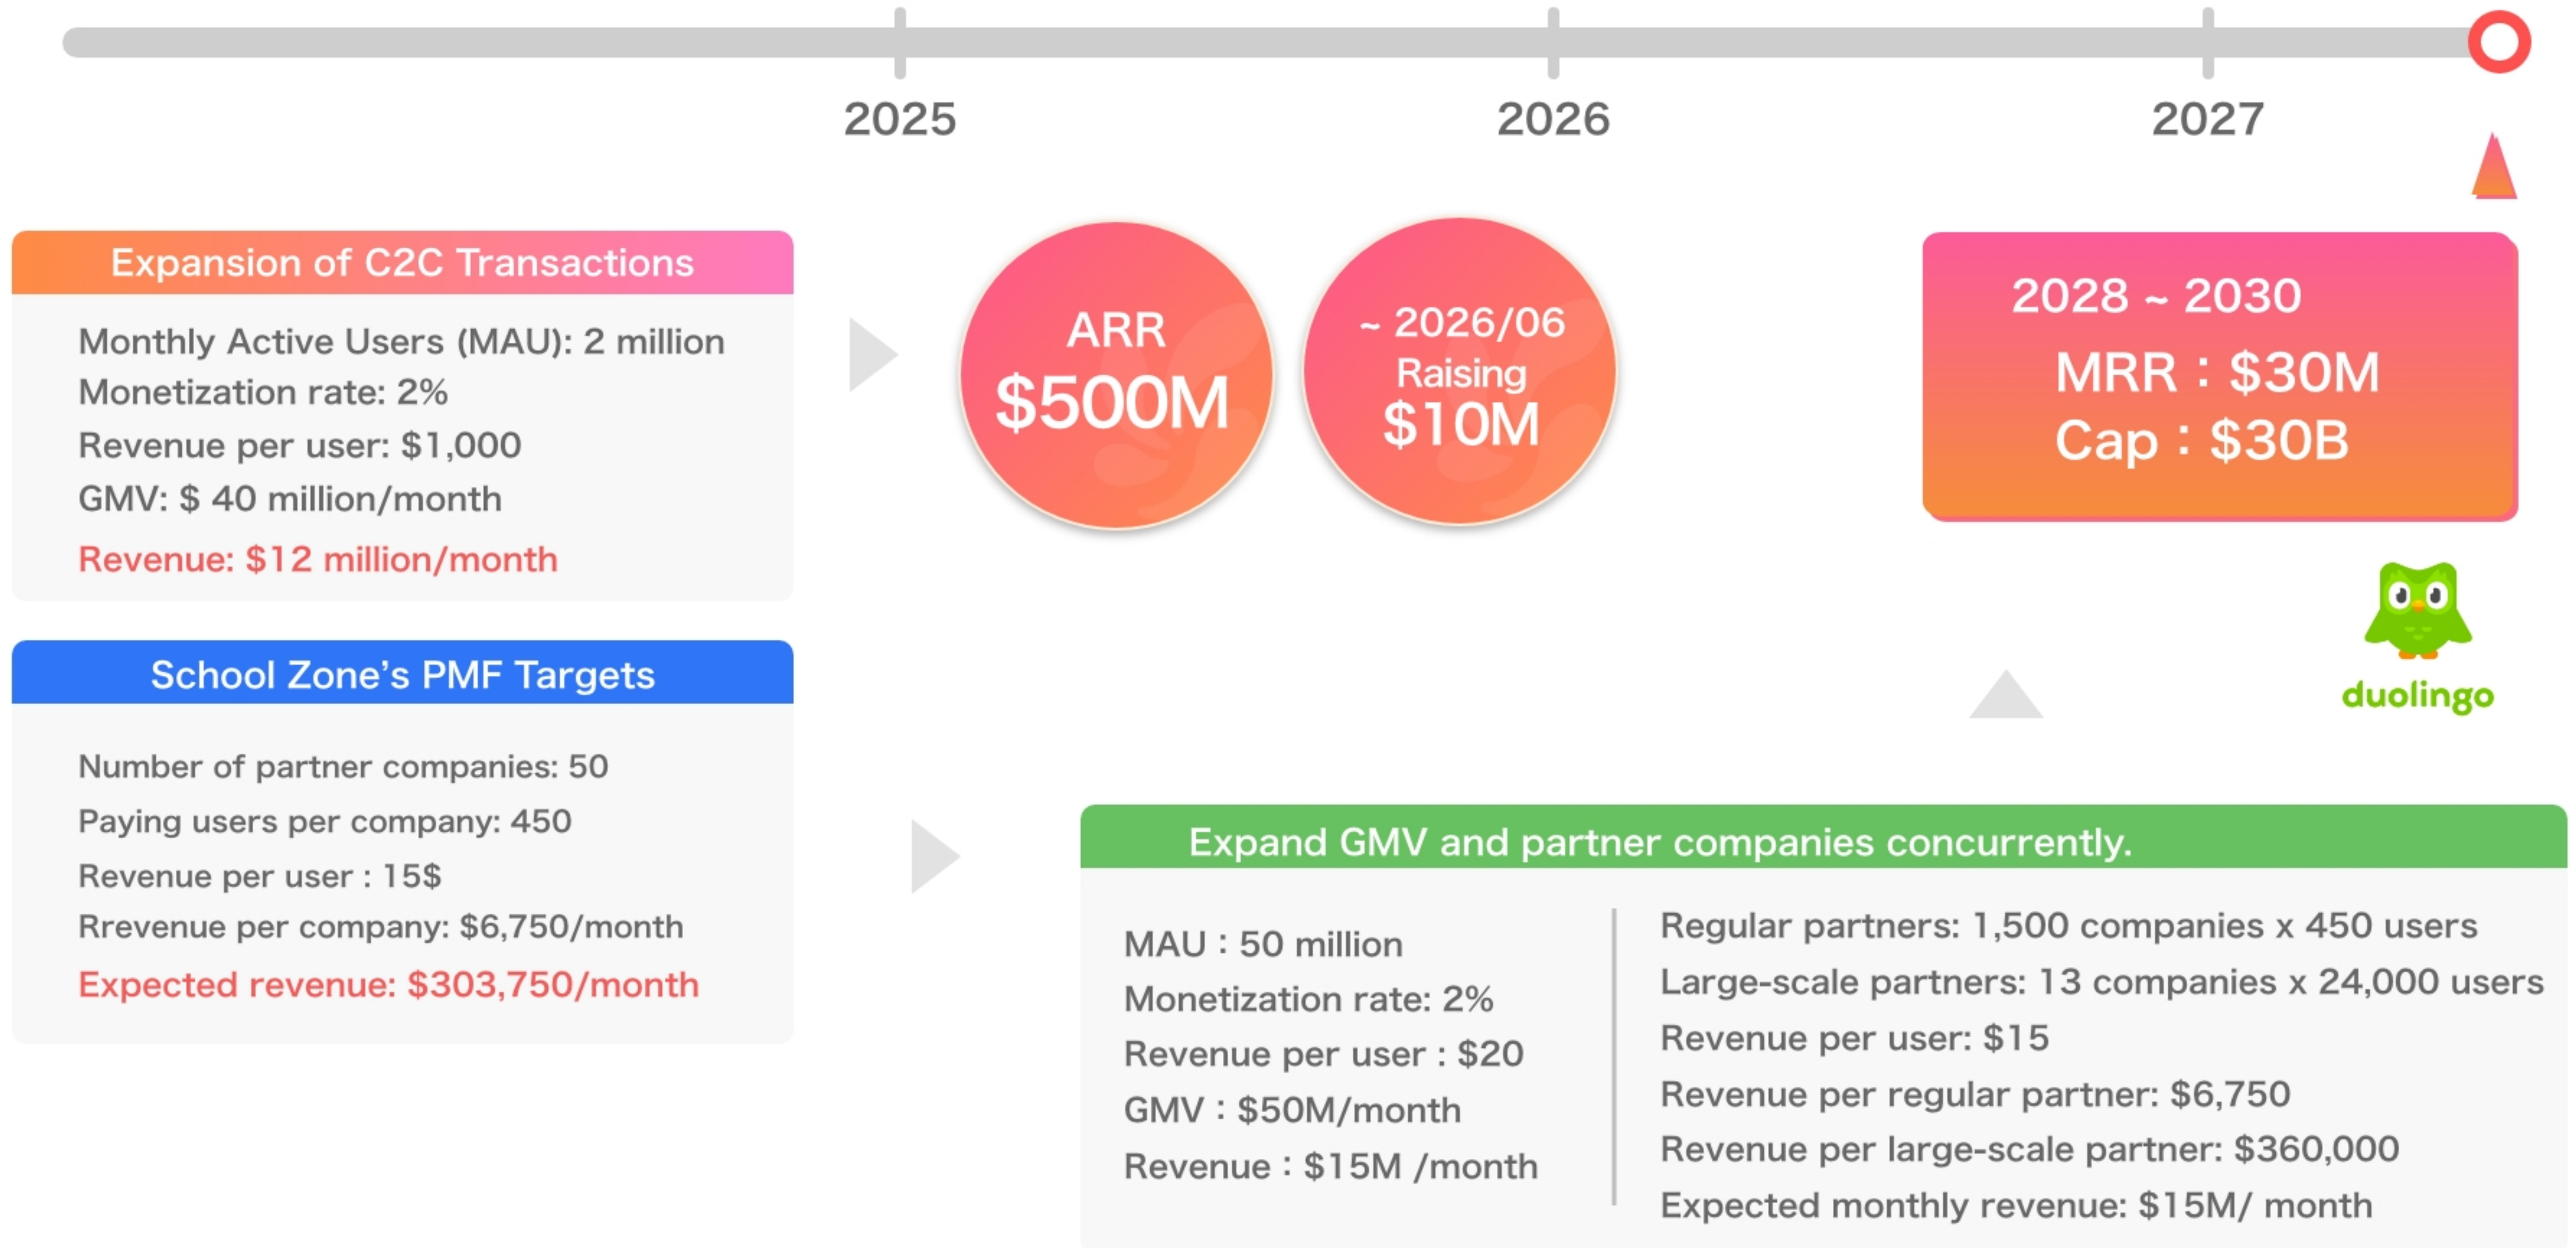

- Continued learning and contributing on fondi attract recruitment scouts from companies.
- Companies can engage with potential hires by sending in-service currency.
- Targeting industries like hospitality and multinational companies seek local English-speaking talent.

Involving Freelance Tutors

- Freelance tutors using platforms like Busuu face high costs in preparing teaching materials.
- Opening fondi's teaching tools to freelance tutors attracts their students, expanding learning content in the service.

Business Model Blueprint and Vision

Targeted Scale

Details of the to C-oriented Business Model:

	Variables	Short-term Goals and priority	Comps and references
Pay-per-use from C = GMV on fondi	$\begin{array}{c} \text{MAU} \\ \text{(Including economically growing countries)} \\ \times \\ \text{Point purchase rate} \\ \times \\ \text{Monthly purchase unit price} \\ \times \\ \text{Take rate} \end{array}$	<p>The initial monetization points:</p> <ul style="list-style-type: none">• Users tipping each other• Charging for learning contents• in-app item purchases <p>Aim for a monthly GMV of \$400,000 with a sales target of \$120,000.</p>	<ul style="list-style-type: none">• Around a 2% payment rate for in-game transactions in Indonesia.• Existence of long-tail communities like Pococha/RELAITY with a user base of approx.

Business potential for consumer C

Market characteristic

Targeted Scale

- Targeted learning needs: **urban areas where English can change careers and the population aged 15 to 65**
- Anticipate 660 million user base by estimating the English-learning segment in economically growing countries based on urban and working-age population ratios

Payment Characteristics

- Assume a stable payment rate for one-time purchases, even in economically growing countries
- "Buying time with money" experiences, like avoiding ads, are expected to be more prevalent in advanced countries.

Current funding approach

- Implement an in-service currency system post-School Zone release, continually optimizing payment rates
- Target a 10x MAU growth to **2 million**, with **2%** subscribing at **\$10 monthly** for a revenue goal of \$120,000/month at a 30% take rate

Expansion leading to IPO

- Leverage the B-to-B model for high-value user acquisition, targeting **improved payment rates and amounts** through subscriptions
- Aim for **50 million** MAU, a **5%** payment rate (similar to Duolingo's IPO), and increasing per-user spending to \$18 ~ 20 by IPO, with a goal of GMV ¥5 billion and revenue ¥1.5 billion

Details of the B2B Model

School Zone's PMF Target

Market Structure

- **Long-tail market** structure where around the top 10 companies hold about 25% of the market
- 1,248 domestic companies, and about 1,500-2,000 in each of the other seven targeted countries

Business Model

- **Initial development costs**
(Start-up expenses for Metaverse School) :
 - AI Role-playing lesson/self-study space:
\$10,000 ~ 15,000
 - Partner-exclusive community space:
\$5,000 ~ 10,000
 - Integration with fondi's space:
\$5,000 ~ 10,000
- **System usage fee :**
\$10 ~ 15 per user per month

Initial Targets

- **Medium-sized English language providers and schools** seek differentiation and strategies to reduce cancellation rates.
- High-spending countries for curriculum investment (Japan, China, Korea, Europe).

Market Environment

- In a maturing market, efforts to improve teacher quality and curriculum have plateaued in reducing cancellations.
- In growing competition, the demand is strong for **the next move to boost LTV** beyond improving acquisition costs.

Why fondi?

- The global community fosters an environment for practical English use within fondi.
- Invest in developing innovative learning tools leveraging AI and virtual spaces.

B2B Business Model Goals and Potential

Market Characteristics

Revenue Targets

- Partner companies: 50
- Revenue per company: \$6,750/month

Expected Revenue:
\$337,500/month

Target Scale

- Focus on businesses with an average customer spending of \$10, allocating 10-15% of that cost to improve learning content.
- Around **500 Japanese** and **5,900 international companies** are within the top 40% scale category.

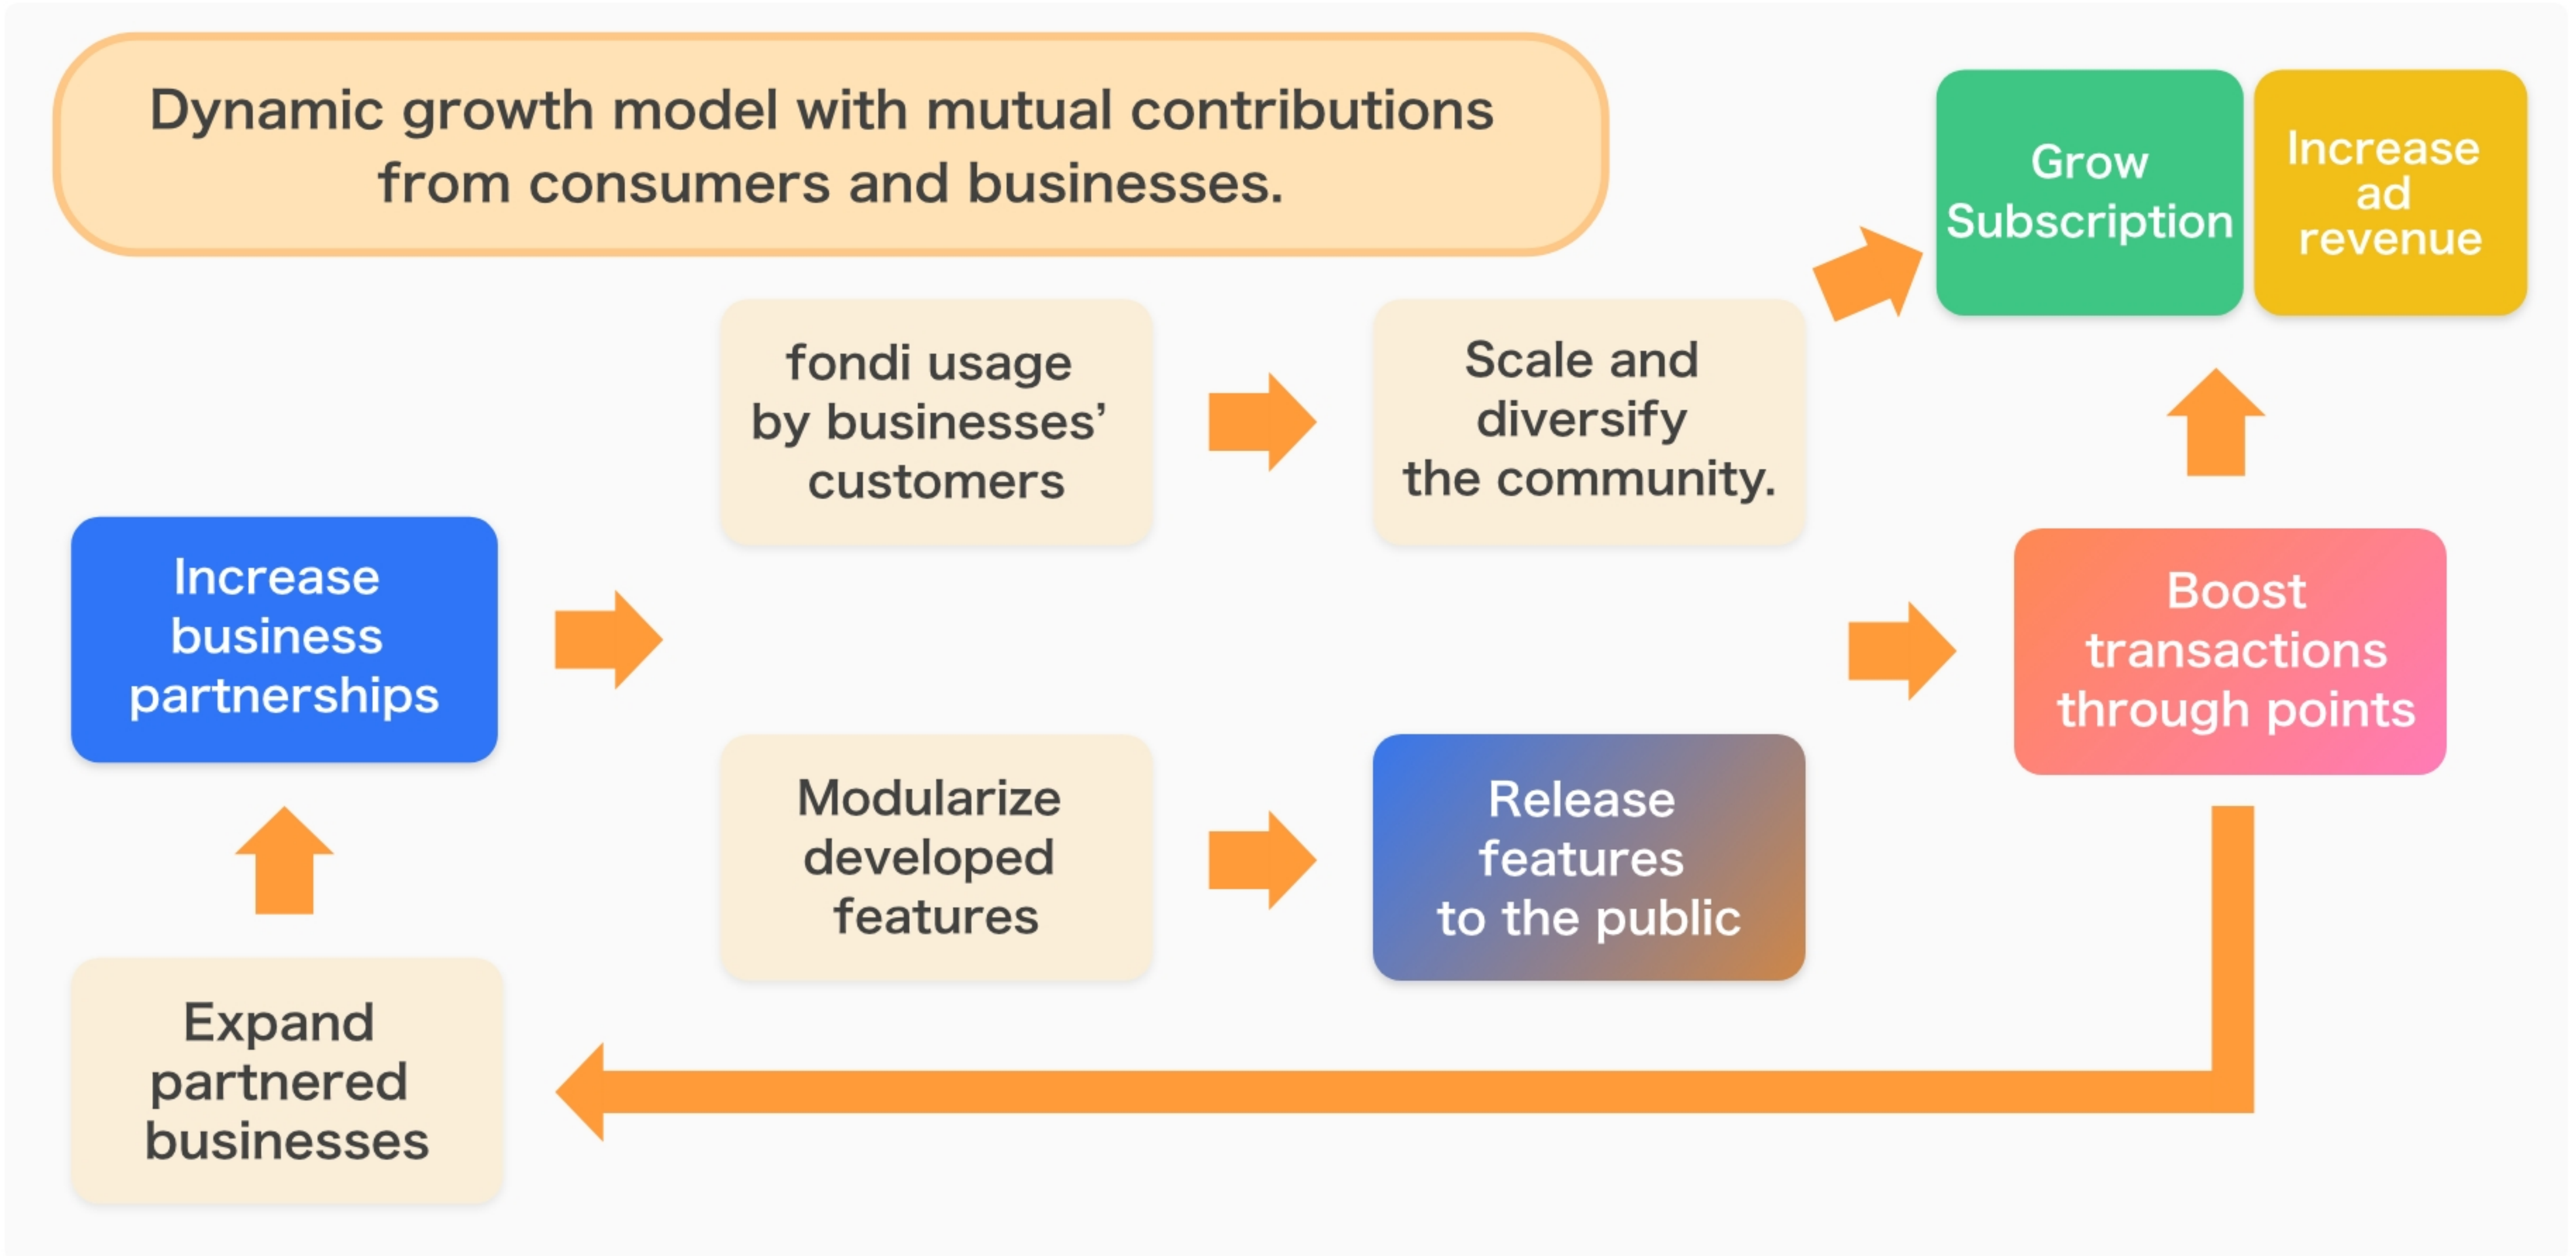

Current funding approach

- Prioritize mid-sized providers **keen on investing in differentiation and new content**, showcase reduced churn rates as a foundation for introducing the platform to the top 10 companies.
 - Estimate revenue based on the total of domestic providers, assume an average of **450 learners** per provider (excluding the top 10). The revenue per provider is around \$6,750 per month, excluding development costs
- ※ Exploring partnerships with international providers in the near future

Expansion leading to IPO

- Expand fondi team globally, aiming to establish a norm where **using fondi for classes is as common as using Zoom**, including the top 10 companies
- Target a monthly scale of \$15 billion with partnerships from 1,500 mid-sized providers and 24,000 learners per provider from the 13 large-scale providers.
- Aim for fondi adoption in private English education providers, **universities, and high schools**, with future expansion into the higher education market.

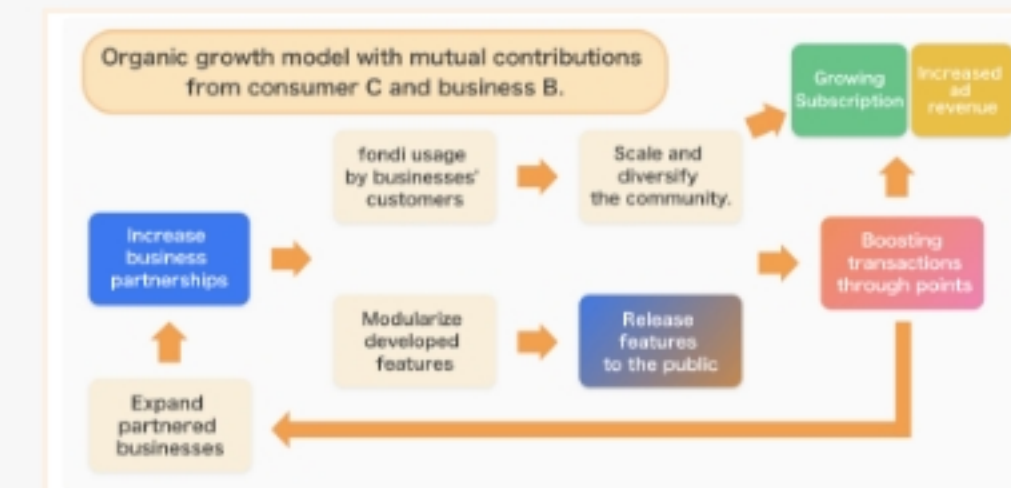

Strategic positioning of each monetization model.

Distinguishing from competitors with MOAT

		 		
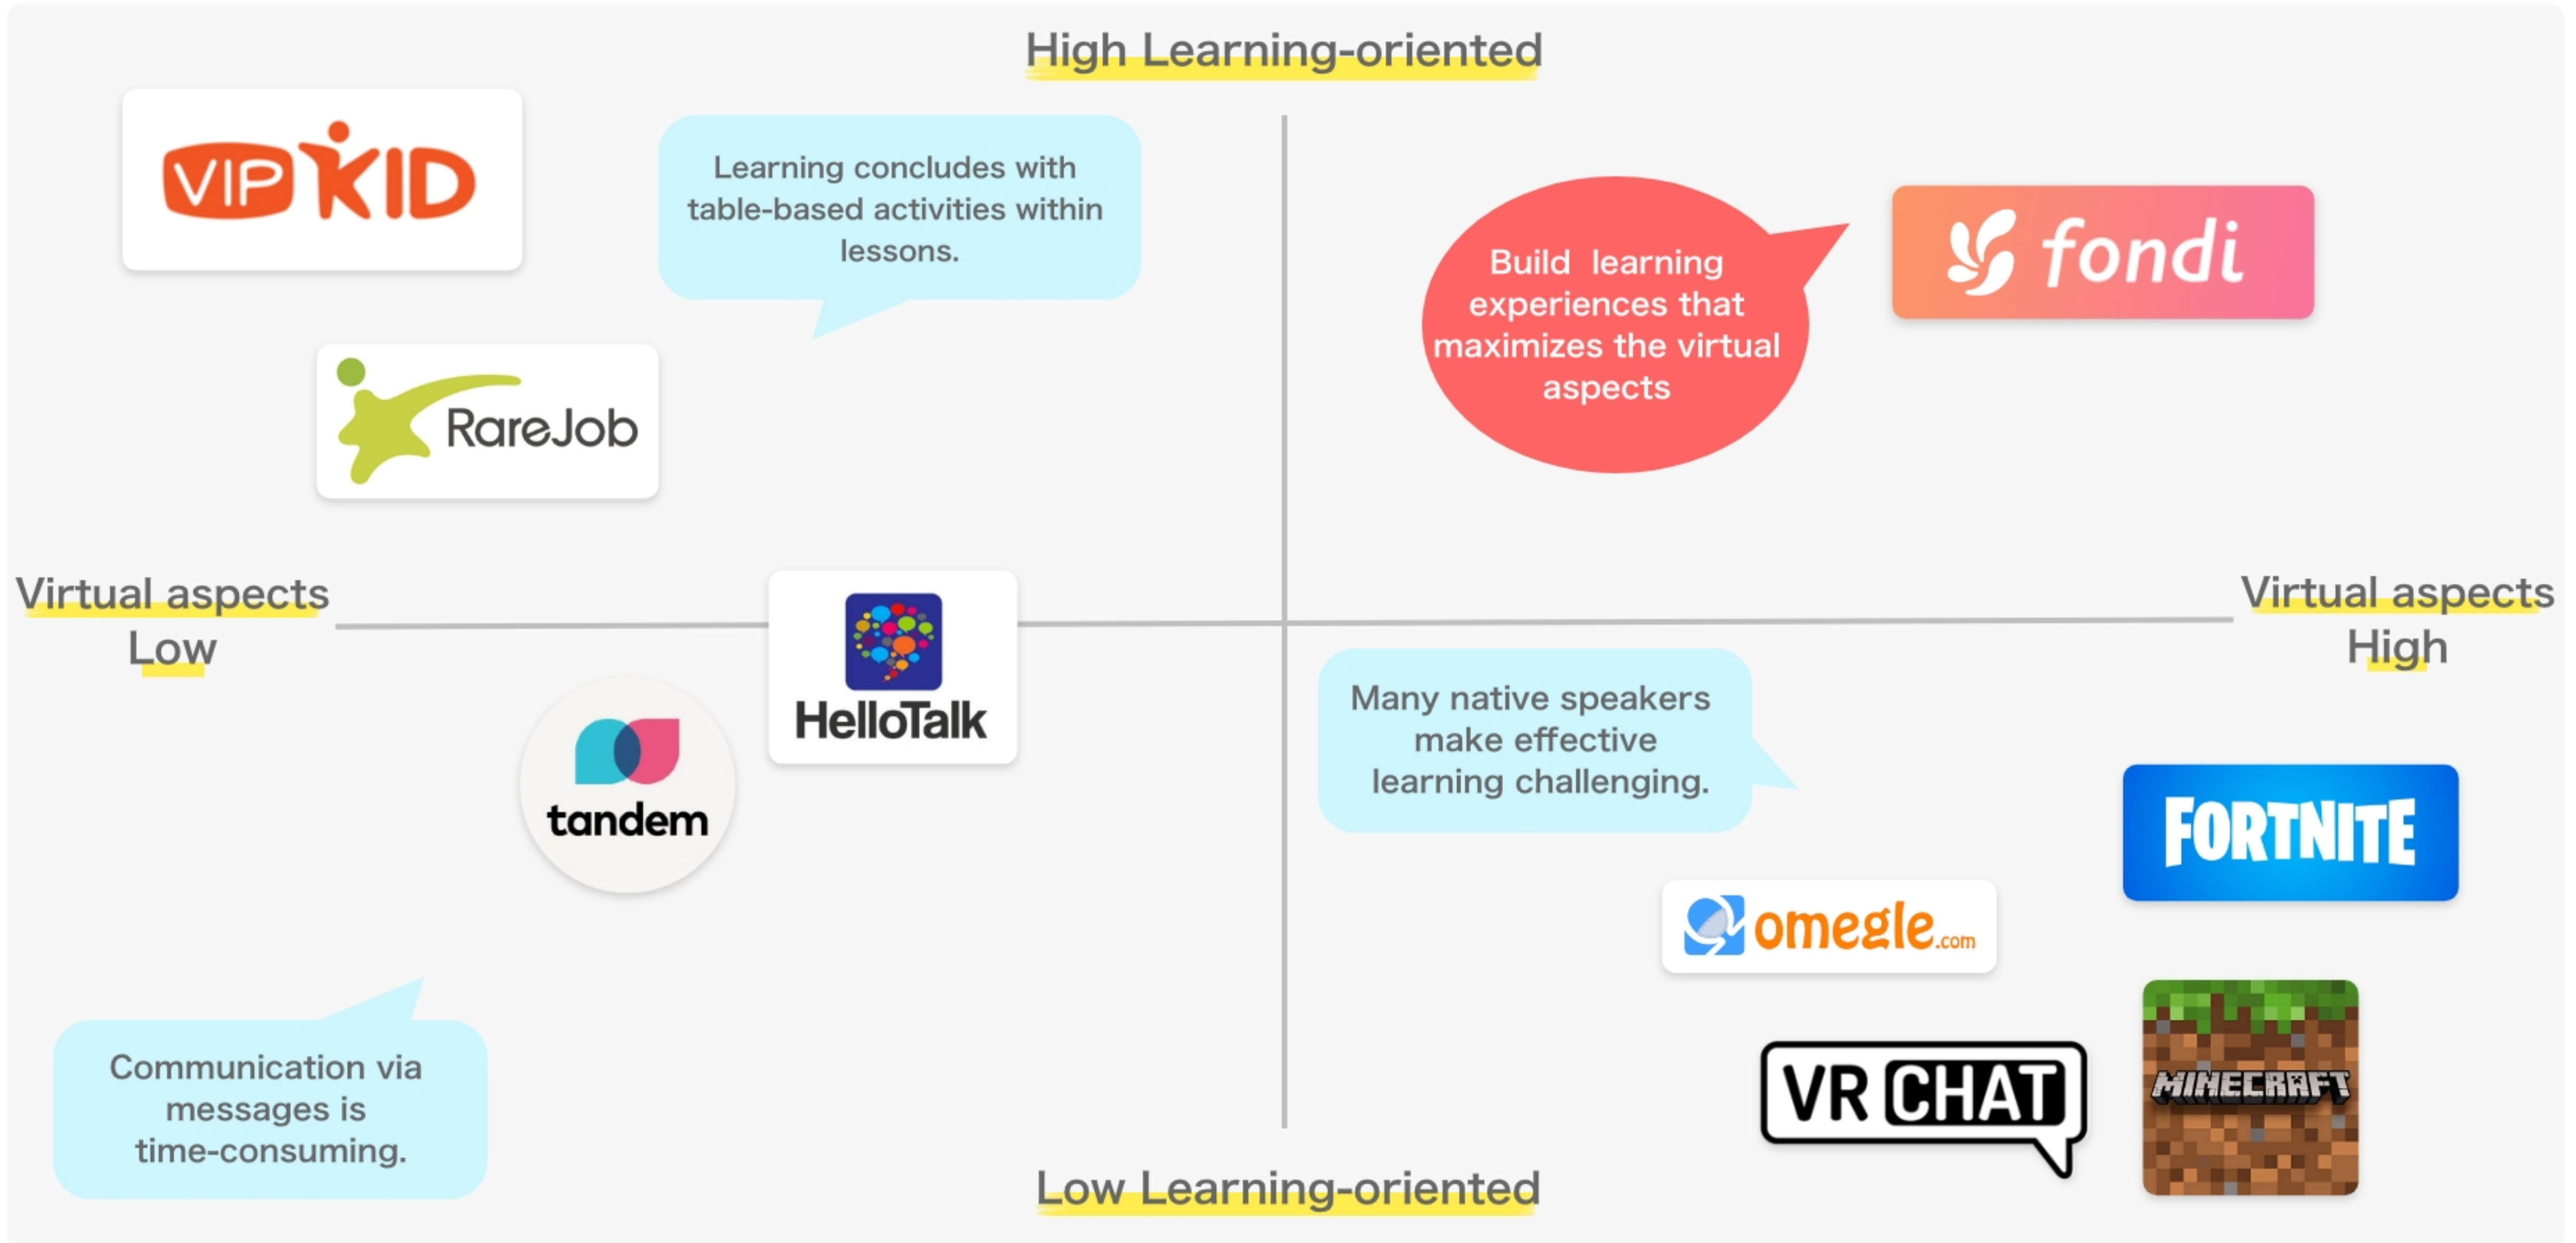

Community	Features exist, but no users.	None	Limited to internal use by businesses or schools	Community on the scale of a market leader
AI utilization	None	Primary use in assessments	None	Actively investing in preparation
Provided lessons	Their branded lessons	Their branded lessons	Platform for Schools	Platform for language providers
Platform	VR • PC	VR • PC, Available as a mobile app	VR • PC	Mobile app only *Anticipating future PC expansion.

MOAT • Advantages

- Our strongest advantage: established community
- KSF:
Align business platform provision with expanding the end-user base for transaction maximization

Macro competitive environment

Long-term product vision

Virtual university where people worldwide, regardless of generation, learn together

Use 3D for educational content

Partner with universities and education providers to provide diverse learning content in the metaverse

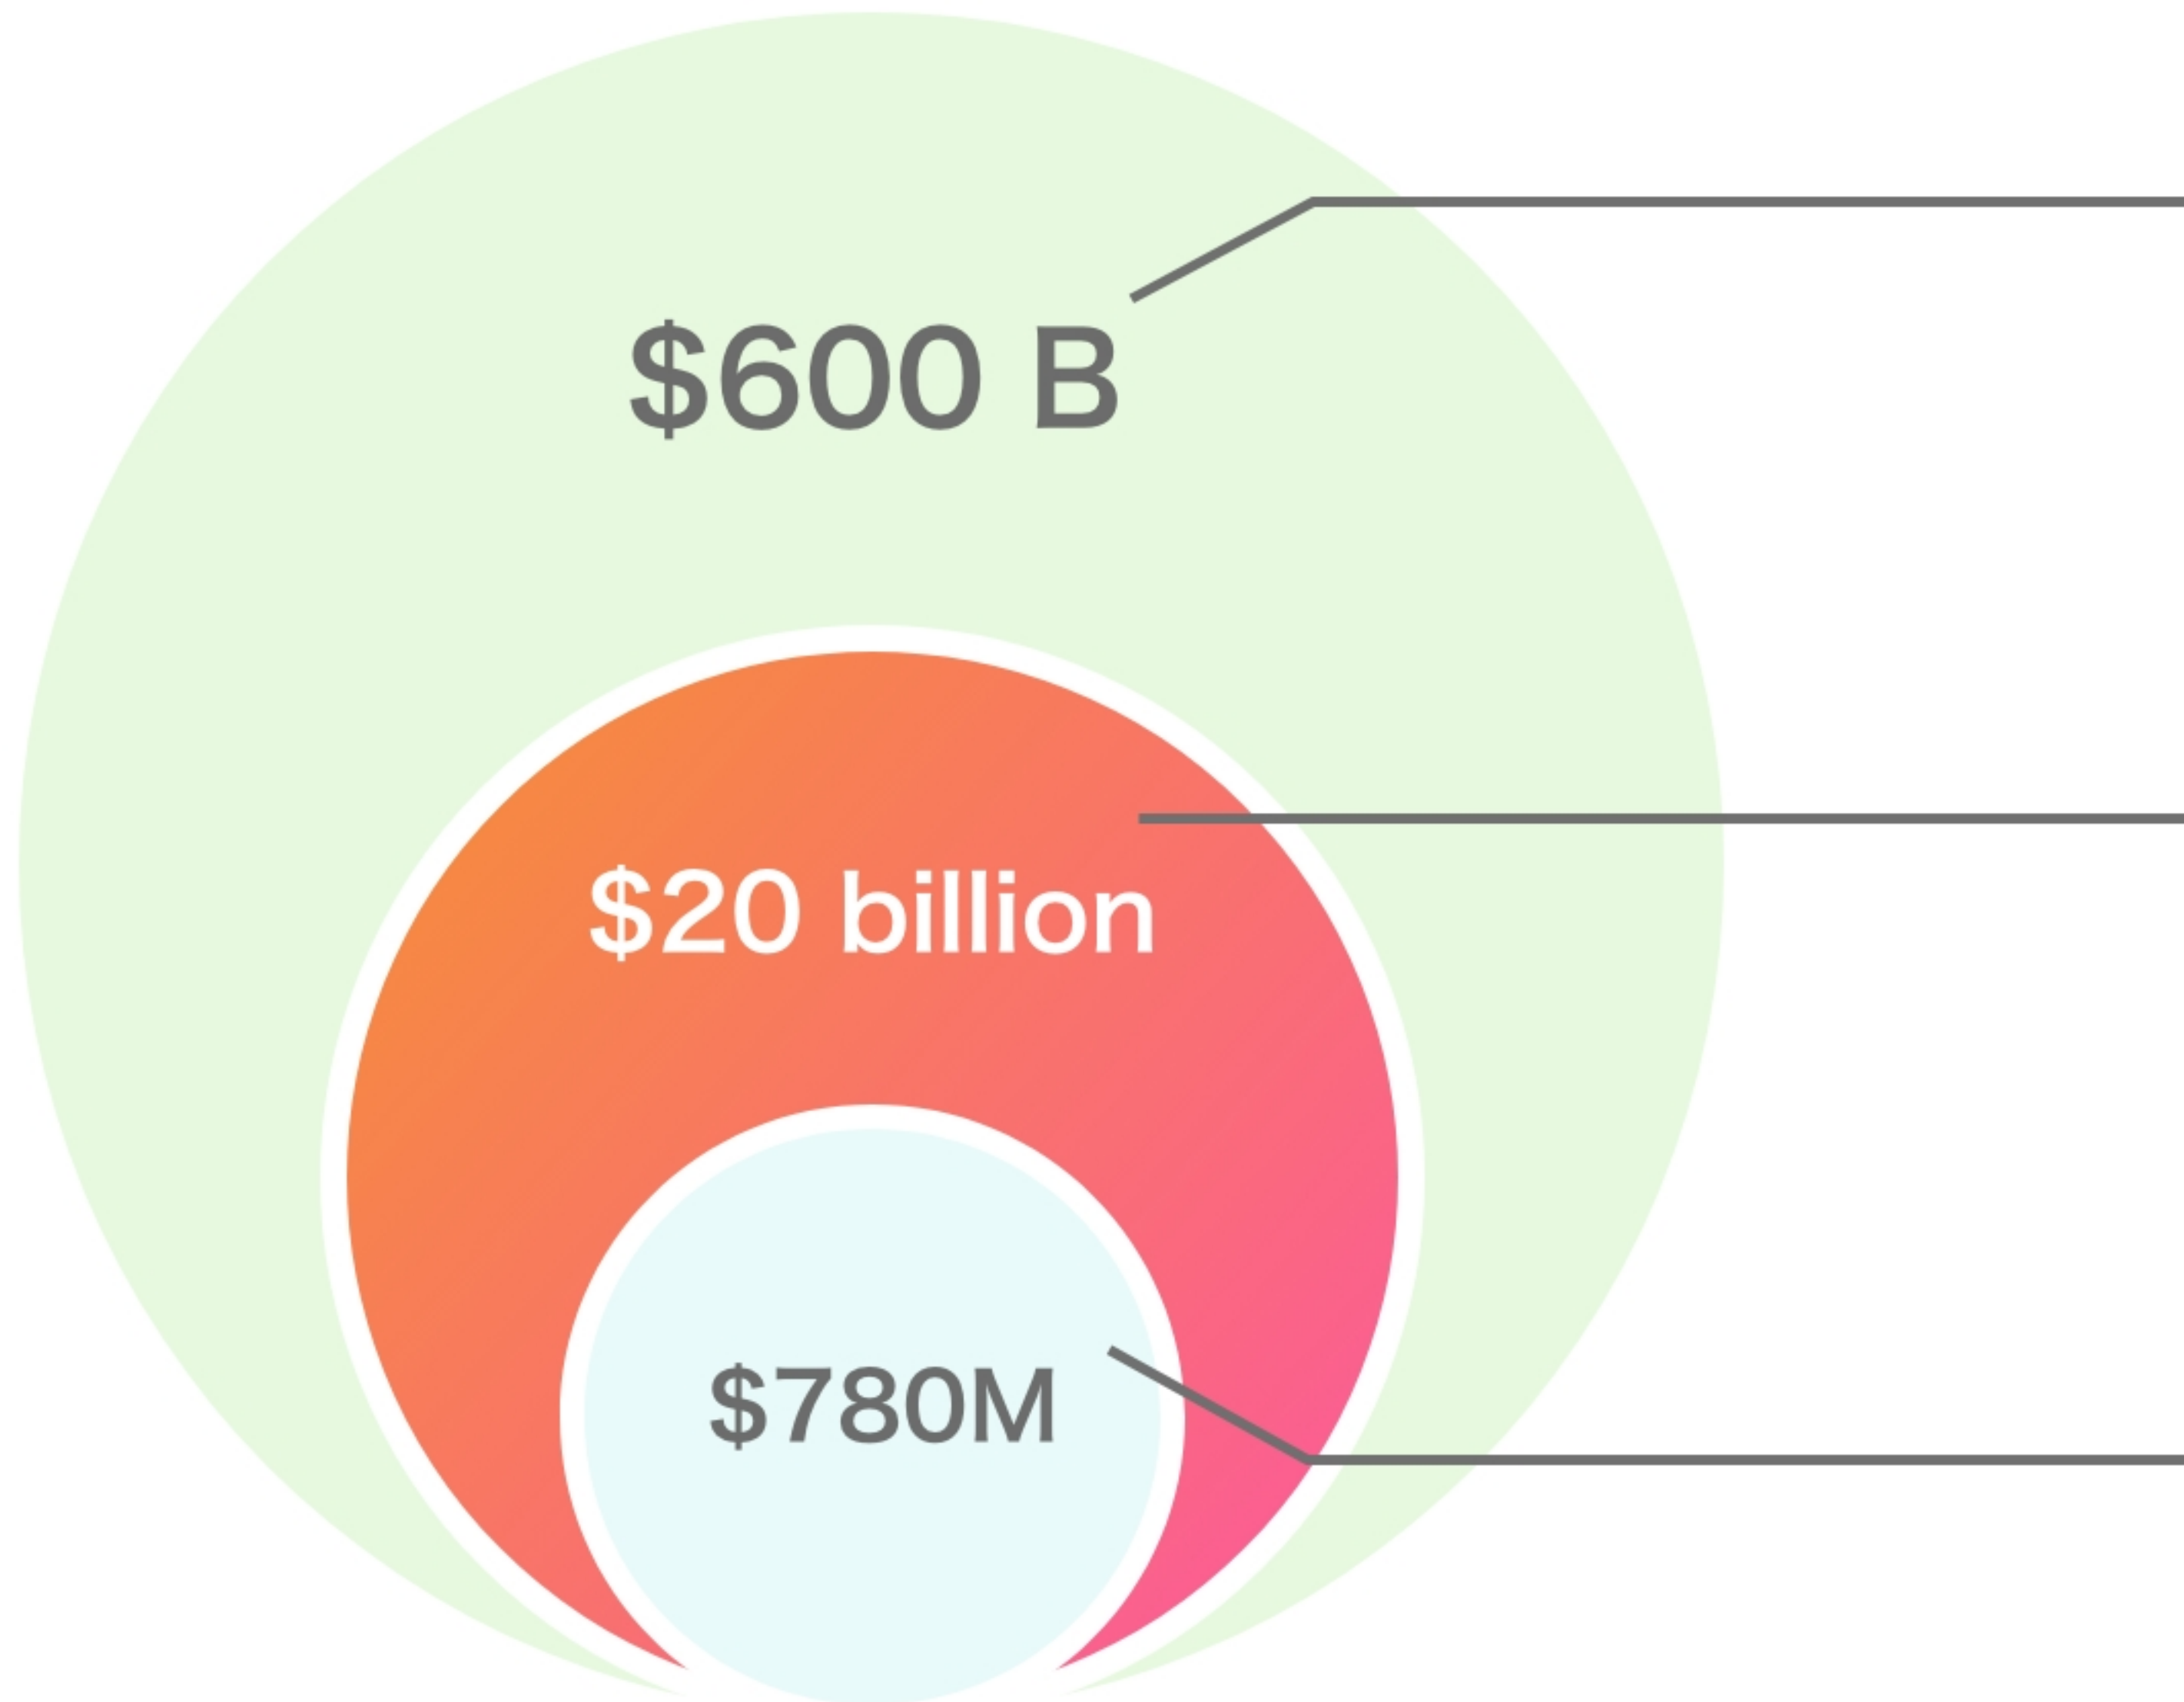

Community

Expand a diverse global community with deep user interactions

Connecting value by in-app economic zone

Total Accessible Market

Lifelong learning beyond languages

Entire higher education market

Expand virtual learning in a market expected to grow at 21.5% CAGR

Upside for consumer C traction

660M ppl x 5% x \$20/month x 30%

Target urban working-age population as core users, referencing other business cases

Expected market for School Zone

Assumed user numbers charging \$15/month

Rough estimate based on 7 countries with substantial investments in English programs
