## Meet the founder

"We founded SquaredFinancial back in 2005 endowed with the belief that financial literacy is a key component to any investment success, and we have made great strides in advancing trading knowledge. Over and above, we firmly believe that trading thrives on information, discipline, and knowledge – the essential ingredients for achieving your investment goals.

Over the course of the past three years, we have successfully attracted significant investors and notable entrepreneurs to our endeavors. We have expanded exponentially into challenging countries and jurisdictions. We have increased our products threefold and integrated high technology and automation into our systems.

We provide cutting-edge trading platforms and a state-of-the-art mobile application because we aspire to provide our traders with the flexibility to engage in diverse investment opportunities, enabling them to trade anytime and anywhere. What we have achieved so far would not have been possible without our team, because it's all about people: our clients who choose us as their long-term trading partner and who believe that we can help them grow and diversify their investments; our team who live and breathe the service they want to give to our customers, who share with us the same culture and are investing their knowledge and know-how to further grow SquaredFinancial and within it."

Today, we find ourselves firmly on the path toward becoming a one-stop shop, diligently progressing towards the realization of our goal.
